

Corporate Actions Adaptation Plan

LuxCSD

Activity	Corporate Actions
Plan submitted by	LuxCSD
NSG	Luxembourg
Date	June 2021

Background

The Adaptation Plan provides information on the changes which will be implemented to meet the AMI-SeCo Standards for Corporate Actions which form part of the Single Collateral Management Rulebook for Europe (SCoRE). Full details of the Corporate Actions Standards can be found on the [ECB website](#).

The document is structured as follows: Section 1 (Cover Letter) provides a high-level summary of the changes in order to implement the AMI-SeCo Standards. Section 2 (Adaptation Plan Table) then provides a more detailed overview per Standard covering a feasibility assessment and the implementation milestones.

1 Cover Letter

LuxCSD fully supports the introduction of SCoRE collateral management harmonisation standards endorsed by AMI-SeCo. This support is reflected by active participation in the design of the new standards for Triparty Collateral Management, Corporate Actions and Billing in the different workstreams and Expert Groups of the Collateral Management Harmonisation Task Force and by the commitment to target implementation of these standards and migration to the Eurosystem's ECMS platform according to the current published Go-Live timeline of November 2023. The resulting changes will impact all market actors interacting with LuxCSD, however LuxCSD will seek to limit impact to clients as far as possible.

LuxCSD is already largely compliant with 7 out of the 15 standards and work is now focusing on the implementation of the remaining changes. More information regarding specific impacts will be given during the course of 2021.

The below analysis of corporate action standards covers LuxCSD activity in its role as the Issuer CSD. The impacts on the Investor CSD model will be analysed based on the adaptation plans submitted by other CSDs and are not included in this report.

Analysis of corporate action standards regarding LuxCSD service on Triparty Collateral Management positions are also covered in this report. Please note however that for Triparty Collateral Management transactions, positions will normally be substituted by Clearstream Banking Luxembourg as TPA in all cases except non-taxable coupon payments. Any proceeds which are credited to collateral accounts will be subject to a retrocession payment processes. In any case, all processing of corporate action events for Triparty Collateral Management positions will be performed by LuxCSD as CSD, according to the standards.

Please note that as technical implementation details within the standards have not yet been fully specified and some SCoRE standards are still under discussion and subject to change, all details, including all dates in this report are indicative based on current information, and cannot therefore be considered final. This may be refined once full impacts and requirements are known. Full details are given in the text below.

We encourage all LuxCSD customers, particularly ECMS participants, to review the standards described herein, in order to familiarise themselves with potential changes in relation to corporate actions impacting processing, validation, and/or calculation methods.

Feasibility Assessment/Legal barriers:

LuxCSD already largely complies with 7 of the 15 of the Standards. However, the implementation of some standards requires the adaptation of existing reporting to include new data elements and fields outlined in the key data elements requirements, as well as implementation of the new ISO20022 formats. LuxCSD would also need to develop new reporting as required by the standards (e.g. Corporate action event processing status advice).

Both ISO 15022 and ISO 20022 standards will be supported during the transition period. Exact procedures for the support of both ISO standards are not yet finalised as ISO 20022 introduces new messages that do not exist in ISO 15022. Specific mapping (where possible), validation and processing of the messages in both versions will be required. More information will follow in due course.

The developments for SRD II have been leveraged to cover the requirements for some messages and flows, especially for meeting events.

LuxCSD will implement the new standards in terms of entitlement calculation and rounding rules.

The coexistence of different business flows for distinct asset classes, markets and customers' needs to be analysed further.

LuxCSD readiness and compliance have an external dependency on Issuers/Agents for Issuer CSD business and on Issuers CSDs/Agents for Investor CSD business.

Our initial analysis of the requirements identified no critical legal barriers. However, we will only be able to confirm that after the finalisation of the ECMS requirements and a subsequent analysis of the impacts has taken place.

Milestones:

It is important to highlight that not all process flows and messages have been specified yet and thus no final requirements exist, e.g. taxation processes, reporting of blocking indicator, etc. CA standards for debts cannot be seen and implemented on a standalone basis and the dependency with other services (e.g. settlement), asset classes (e.g. shares), markets (e.g. non-EU) and customers (e.g. non-ECMS) must be considered. For this reason, the implementation dates described below are indicative and are subject to change. However, LuxCSD has made significant progress during the past year on refining scope and analysing impacts and is now progressing well with internal requirements definition.

We have communicated to our clients the relevant impacts and changes introduced by SCoRE and ECMS at a high level during the second half of 2020. Further detailed information will be published during the course of 2021, subject to the finalisation of relevant requirements.

LuxCSD targets to start User Testing in November 2022, subject to further clarification by the ECMS regarding scope, planning and details of User Testing.

Additional Information	Rounding rule no. 1	For cash payments, the cash amount to be paid is to be rounded down to the number of decimals permissible in the payment currency (i.e. to 2 decimals in case of EUR payments).Accordingly, and as an example, a cash amount of EUR 2.556 should be rounded down to EUR 2.55	Adaptation Required	Update the rounding rules as per standard to apply round down.	None identified so far								
	Rounding rule no. 2	For securities movements, the securities amount should be rounded down to the nearest full unit.	Implemented	LuxCSD will apply this standard where possible. However, it is also subject to Issuers/Agents readiness and compliance.	None identified so far								

AMI-SeCo Standard			Feasibility Assessment			Implementation Milestones			
No.	Name of Standard	Standard	Adaptation Required?	Description of Changes Required	Legal Barrier Identified?	Please indicate the expected date of completion of the following activities:			
	Rounding rule no. 3	For the calculation of cash payment amounts or securities movement amounts relating to a specific securities account, the ratio applicable to the entire issue should be applied to the total holding in the parent ISIN on the securities account. (There should be no intermediate step whereby a ratio per 1,000 nominal is calculated, and then applied).	TBC	Under discussion with the market.	None identified so far				
	Rounding rule no. 4	The ratio specified by the Issuer CSD in the event notification should be passed on in its entirety in the event notification sent by all Account Servicers and Custodians in the custody chain. (There should be no rounding up, or rounding down, or truncation, of the ratio).	TBC	Under discussion with the market.	None identified so far				
5	Negative cash flows	<i>Issuer CSDs and Investor CSDs shall support the processing of corporate actions where the underlying security has a fixed negative interest rate or a floating rate coupon. Any negative interest shall result in a cashflow from the Investor to the Issuer which shall be processed using the Interest Payment (INTR) event.</i>	TBC	The introduction of the negative cash flows is conditioned by: a/ SWIFT implementation of a new structured field for ISO15022 and 20022 messages by both CSD and Agents b/ Clarification of the corresponding end-to-end flows from investors to issuers, including linked withholding tax processing and market claims. c/ Legal guidelines in terms of management of the default scenario with an investor or an intermediary on cash transfers in the value chain from investors to issuers.	Legal barriers to be checked (e.g. CSDR compliance, Contractual framework)	Analysis and Communication	Yes	No	n/a

M13: Standard implemented by 20/11/2023	<input type="checkbox"/>	<input type="checkbox"/> DD-MM-YYYY	<input checked="" type="checkbox"/>						
	<i>The EU's standard practice for defining securities amount data is consistent usage of FAMT for debt instruments and UNIT for equities. This Standard builds upon the standard currently applicable in T2S markets and which should be applied on a pan-European basis.</i>								
8	Payment time	<i>Corporate action cash proceeds shall be distributed as early as possible, but no later than 12 noon, on the corporate action payment date. For any corporate action event involving a partial or full redemption, the cash proceeds should be made available by the Issuer CSD at the same time as the processing of the partial or full redemption on the payment date so that relevant parties are compensated/paid in a timely fashion for the partial or full redemption.</i>	TBC	This standard is currently under review within AMI SeCo and other market associations. CSD's compliance with the standard depends on the compliance of Issuers/Agents.	None identified so far	Analysis and Communication

	Payment time for government bonds	For government bonds issued in domestic CSDs cash proceeds are paid no later than open for business of the payment system (i.e. 07:00 for TARGET2).	TBC						
	Payment time for corporate bonds	For corporate bonds, the current minimum requirement is that cash proceeds be distributed no later than noon in the time zone of the Issuer CSD (consistent with existing CAJWG Standards). In line with recent improvements in market infrastructure in Europe (e.g. through the introduction of T2S) there are opportunities to improve the current latest time by which payments should be made with a latest cut-off time of 10:30 already feasible in many markets.	TBC		None identified so far				
9	Notification of processing status	<i>In the event that an issuer, issuer agent, or Issuer CSD cannot process a Corporate Action on the previously announced Payment Date, then all Account Servicers shall inform Account Owners about the delay as soon as possible and based on information received from higher up the custody chain.</i>	Adaptation Required	This reporting is not supported today and has to be implemented; define business flows External dependency on Issuers/Agents	None identified so far	Analysis and Communication	Yes	No	n/a

		Underlying Securities on which an election is made should be separated accounting-wise from non-elected Underlying Securities by the (I)CSD and all Intermediaries. Accordingly there shall be a harmonised set of CA events where participation requires the blocking of securities (blocking refers to a period of time in which an investor's securities are prevented from being accessed). On this basis, Account Servicers shall include an indicator in the CA notification message to identify if a security position will be blocked. A "Follow-the-Issuer CSD" principle shall be applied. Blocking of securities should take place when the following criteria are met simultaneously: 1. The CA event participation type is either Mandatory with Choice (CHOS) or Voluntary (VOLU) 2. The option results in a debit of a security position In the case of debt instruments, the following CA events and CA option combinations are subject to blocking:		Blocking of the elected security position is also applied by LuxCSD in case if the given CHOS/VOLU event does not result in a debit of the security position and has no RD.
