PRESS RELEASE

2 July 2015

Statistics on euro area Insurance Corporations and Pension Funds: First quarter 2015

In the first quarter of 2015, the total financial assets of euro area insurance corporations and pension funds increased to €9,444 billion, from €8,858 billion in the previous quarter. Over the same period, the amount outstanding of insurance technical reserves, which are the main liabilities of insurance corporations and pension funds, increased to €7,630 billion, from €7,222 billion. This increase was largely due to an increase in value of corresponding assets, but also to transactions by €123 billion.

Selected balance sheet items of insurance corporations and pension funds

(EUR billions; not seasonally adjusted; amounts outstanding at the end of the period; transactions during the period)

	Amounts outstanding			Amounts outstanding	Transactions ¹
	2014				
	Q2	Q3	Q4		
Total financial assets	8,466	8,653	8,858	9,444	n.a.
Insurance technical reserves ²	6,937	7,078	7,222	7,630	123
net equity of households in life insurance reserves	3,640	3,692	3,745	3,903	45
net equity of households in pension fund reserves	2,409	2,497	2,589	2,811	38
prepayments of insurance premiums and reserves for outstanding claims	888	889	888	916	39

¹ Transactions are available only for euro area insurance technical reserves.

² Insurance technical reserves contain the provisions against policyholders or beneficiaries set aside by insurers and pension funds to meet future obligations. This item also includes prepayments of insurance premiums, which are related to non-life insurance and to reinsurance, and reserves for outstanding claims, which are the amounts expected to be paid out in settlement of claims, including disputed claims.

Regarding the breakdown of the assets of the aggregated balance sheet of euro area insurance corporations and pension funds, holdings of **securities other than shares** accounted for 40% of the sector's total financial assets at end-March 2015. The second largest category of holdings were **investment fund shares**, which contributed 27% to the total financial assets. Finally, **shares and other equity** accounted for 11% of the total financial assets.

Turning to transactions in the main breakdowns of the **insurance technical reserves**, the **net equity of households in life insurance reserves** increased by €45 billion in the first quarter of 2015. The **net equity of households in pension fund reserves** increased by €38 billion in the same quarter, while transactions in **prepayments of insurance premiums and reserves for outstanding claims** increased by €39 billion.

Regarding the contributions of the two sub-sectors, **insurance corporations' total financial assets** accounted for €7,127 billion at end-March 2015, representing 75% of the aggregated balance sheet of the insurance corporations and pension funds sector, while the **pension funds' total financial assets** amounted to €2,317 billion.

Source: ECB.

1) Figures may not add up due to rounding.

2) Includes reinsurance.

3) Prepayments of insurance premiums are related to non-life insurance and to reinsurance. Reserves for outstanding claims are the amounts expected to be paid out in settlement of claims, including disputed claims.

4) The net worth is calculated as the difference between total assets (financial and non-financial) and liabilities, and may also reflect statistical discrepancies.

Note: Unit-linked insurance contracts do not guarantee a return to the policyholder, but rather offer a return which depends on the performance of the underlying portfolio.

In a defined-contribution pension scheme, the participant's contributions are determined in advance, but the level of pension payments is not.

In a defined-benefit scheme, future pension payments are determined in advance, based, for example, on the wage history and years of service of a participant.

A hybrid scheme is a combination of the two previous types of pension scheme described above.
