

# ECB BMCG – BOND MARKET DEVELOPMENTS

NATHALIE FILLET  
BNP Paribas  
14 December 2020

**BNP PARIBAS**

The bank for a changing world

# EGBs Rates dynamics since September

---

## Core/semi-core: Tight range but bias on lower yields

- **Late August to early September:** Bund sold off before the September EGB supply to -40bp but the move was short lived
- **September & October:** Rising speculations of a PEPP increase fuel fears of a bund scarcity + risk off on equities leads to a short squeeze on Bunds.
- **Vaccine news:** leading to a 20bp bund sell-off in a few days and a curve steepening but the move reversed again to reach new lows early December.

## Risk on/risk off: three periods

- **Early September to mid-October:** although new covid-19 cases rise back in Europe (Spain and France), markets remain confident on an extension of the PEPP and spreads tighten: 35bp on 10y Italy vs Germany.
- **Mid-October to early November:** a few European countries announce lockdown which creates a panic selling on European equities and a risk off rally on bunds. 10y Italy cheapens back by almost 20bp.
- **Since early November:** S&P changes its rating outlook of Italy to stable and C. Lagarde has been seen as very dovish at the ECB meeting. Positive outcome of the US elections. Investors return into peripherals with the 10y BTP/bund tightening by 25bp.

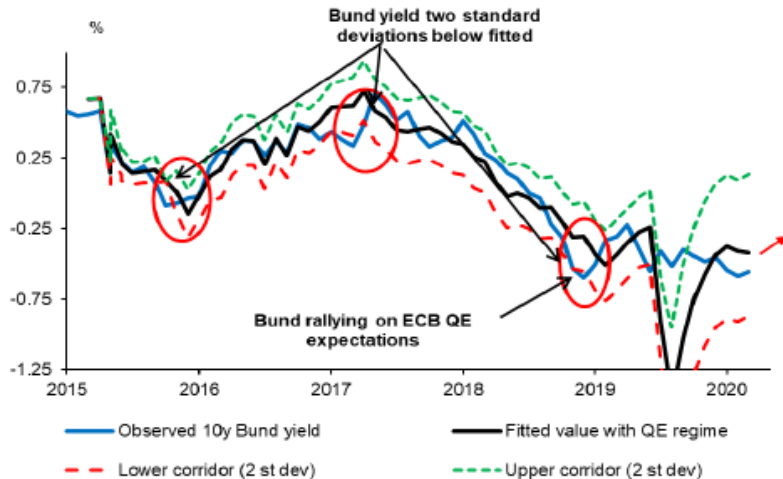

## Lessons learnt?

- **Market expects CBs to maintain very accommodative monetary policies and well absorbs the increasing supply in general and the new comer EU in particular**
  - **Market pays less attention to fundamentals since the vaccine news as they are seen as less informative and backward looking**
- 

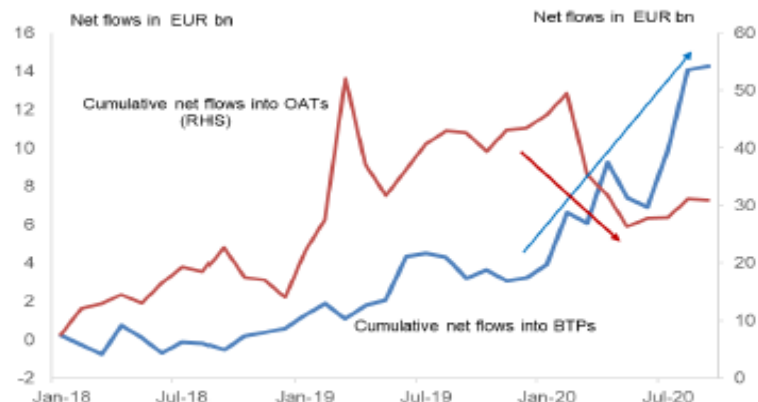

# 10Y Bund still expensive & flows have supported Peripherals in 2020

## 10y Bund yield was up to 20bp below its intrinsic value

## Are BTPs the new OATs for Japanese investors?

Sources: Bloomberg, BNP Paribas

## 10y Bund still too rich versus swap

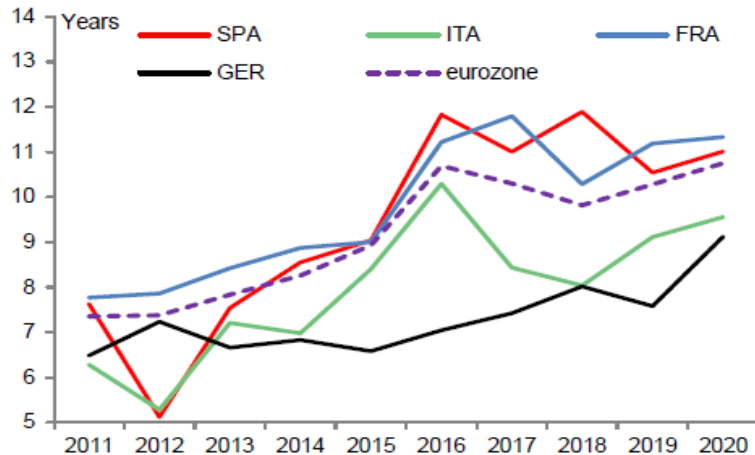

Source: BNP Paribas

- 10y Bund yield intrinsic value rose back from Q1 record lows (-0.67% in June & -0.44% in November) with the rise of the leading indicator. 10y yield was 20bp below its fair value before the vaccine announcement, it is now 11bp below.
- 10y Bund remains too rich versus swap.
- Noticeable change in Japanese investors behaviour in 2020, who have switched from OAT & Bund to BTP since March with a review interest for UST.

## 2021 EGBs supply: a replay of 2020 ?

- Record use of syndications, 25% of total issuance in 2020 versus 15 % in 2019.
- Extension into longer maturities. The weighted average maturity at issuance rose by 6 months in 2020.
- But less reliance on the money market in 2021.

# Points for Discussion

---

- **Covid-19 crisis has resulted in higher debts across the world.**
  - **Will the market be able to absorb a new shock in supply?**
  - **How long the current policy mix (fiscal stimulus combined with accommodative monetary policy) can last.**
  - **How temporary extraordinary measures can be and how getting out?**
- **What is policy makers leeway in case of a 3<sup>rd</sup> wave /lockdown and/or if the vaccine takes more time than expected to be efficient?**
- **There is a large consensus for the reflation trade.**
  - **How big is the risk of the large rebound in inflation.**
- **UST are turning much more attractive than Bunds or OAT for Japanese investors once hedged into Yen**
  - **What impact for EGBs and spreads?**
- **How much competition EU represents for core sovereign issuers?**

BNPP and/or its affiliates as a matter of policy do not permit issuers to review or see unpublished recommendations. BNPP and/or its affiliates acknowledge the importance of conflicts of interest prevention and have established robust policies and procedures and maintain effective organisational structure to prevent and avoid conflicts of interest that could impair the objectivity of this recommendation including, but not limited to, information barriers, personal account dealing restrictions and management of inside information.

BNPP and/or its affiliates understand the importance of protecting confidential information and maintain a “need to know” approach when dealing with any confidential information. Information barriers are a key arrangement we have in place in this regard. Such arrangements, along with embedded policies and procedures, provide that information held in the course of carrying on one part of its business to be withheld from and not to be used in the course of carrying on another part of its business. It is a way of managing conflicts of interest whereby the business of the bank is separated by physical and non-physical information barriers. The Control Room manages this information flow between different areas of the bank where confidential information including inside information and proprietary information is safeguarded. There is also a conflict clearance process before getting involved in a deal or transaction.

In addition, there is a mitigation measure to manage conflicts of interest for each transaction with controls put in place to restrict the information flow, involvement of personnel and handling of client relations between each transaction in such a way that the different interests are appropriately protected. Gifts and Entertainment policy is to monitor physical gifts, benefits and invitation to events that is in line with the firm policy and Anti-Bribery regulations. BNPP maintains several policies with respect to conflicts of interest including our Personal Account Dealing and Outside Business Interests policies which sit alongside our general Conflicts of Interest Policy, along with several policies that the firm has in place to prevent and avoid conflicts of interest.
