II.2.3) **Place of performance**
NUTS code: DE7

II.2.4) **Description of the procurement:**
Travel services include offline and online bookings for air, rail, car rental and hotels based on a transaction fee model and a specific online booking engine (Cytric). The tenderer should be working with a global distribution system (GDS). The online booking engine (OBE) might be subject to change in course of the contractual period. For the offline bookings, the tenderer shall provide a dedicated team dealing solely with ECB-related requests. The services provided should be aligned to the travel rules of the ECB. The contractor might also be requested to take care of air and hotel bookings for groups exceeding 10 travellers.

The past travel volume of the ECB has been as follows: the ECB has approximately 2 700 travellers in Frankfurt am Main and over 35 000 transactions are booked each year. Travel spend is estimated at approximately over 15 000 000 EUR annually. About 89 % of air travel is to main European cities, e.g. London, Madrid, Amsterdam, Rome and Brussels. Intercontinental destinations amount to 8 %, leaving 3 % of business within Germany. About 48 % of the total business travel transactions were by air, rail accounted for 25 % and hotels 26 %. Approximately 14 % of travel is booked online via the online booking engine Cytric and 80 % offline via the travel services provider, at present. An increase of online bookings is envisaged.

II.2.4) **Description of the procurement:**

The ECB is seeking a contractor who will operate the handling of travel expenses under its own responsibility and according to set standards and service levels. The contractor shall in particular provide the operational staff, the supervision, the management skills and the resources to ensure that the service is delivered in accordance with the ECB requirements. The ECB will not provide any personnel for the performance of the service which shall be exclusively delivered by the contractor’s own staff. The travel expense handling services shall be provided at the ECB premises in Frankfurt am Main. The ECB will provide the logistics, office facilities, telephone infrastructure, IT hardware and software, power, lighting, heating and furniture required enabling the contractor's staff to deliver the services.

The implant solution shall be able to handle approximately 17 000 travel expense claims per year, which are manually validated against the SAP system and receipts scanned. It shall further be able to handle approximately 3 300 general expense claims, respective receipts are to be scanned. Currently these services are provided by a staff of 3, most with an accounting background.

II.2.4) **Description of the procurement:**
The ECB is seeking for a contractor who will provide a travel tracker system for all ECB business travellers. The ECB has approximately 2,700 business travellers with more than 35,000 transactions per year and around 10 expats holding a position outside Germany.

The purpose of the travel tracking is to locate all ECB business travellers worldwide and to establish contact with them in the event of emergencies. The following requirements apply:

- the individual travel data must be transferred automatically from the different booking systems (at least from the current global distribution systems (GDS) ‘Amadeus’, ‘Sabre’, etc.),
- it should also be possible to manually add other business-relevant locations (buildings, partner locations and offline booked hotels),
- for the ECB staff managing the tool this data must be accessible as quickly as possible within the travel tracking system in order to determine the location of the business traveller,
- in addition, travel tracking must contain relevant travel warnings and alerts as well as copious country information,
- the travel warnings should contain medical and security-relevant warnings of the destinations and are sent to the traveller as well as the competent staff. Various risk classifications are to be taken into account,
- country information and travel warnings should, if possible, be available via a corresponding mobile application for the most common operating systems,
- travellers must have the possibility to voluntarily allow managing staff to use the traveller’s mobile device location services to pinpoint the traveller location if requested,
- an assistance centre must deliver support to the traveller in the event of a medical emergency, security incident or unexpected travel problem,
- via an easy-to-use communication system it should be possible for managing staff to establish contact with the traveller by means of bulk messages (SMS, e-mail, voice),
- the tenderer should have experience in delivering end-user training both for competent staff managing the tracking tool and for travellers.
