ECB e-tendering – Supplier’s guide

How to register a supplier account

To participate in electronic ECB procurement procedures or to express your interest in future procurement procedures, you will need to set up a supplier account with contact persons by registering in the ECB’s electronic tendering system (SAP Sourcing).

To register you need to provide information on the interested supplier (Company name, VAT number etc.) and information on the contact person (user accounts). Supplier accounts can have several contact persons.

To register, follow the steps below.

Important guidance:

Only user accounts which are linked to the same supplier account will be able to:

(i) view and edit submissions drafted by this particular supplier account and
(ii) receive messages and correspond with the ECB related to the relevant tender procedure.

Register at least one back-up contact person to your supplier account to ensure that someone else can always access the tender and the communication, when needed. To create the back-up contact account, see Chapter III. “How to manage your supplier account” user guide.
