CORRIGENDA

On page 77, Annex I(1), replace the footnote to paragraph 7 of Section III of Part 1 with the following:

(*) i.e. the sum of the intra-stratum variances defined as \( \sum_{h} \sum_{i \in h} \frac{1}{n} (x_i - \bar{x}_h)^2 \) is to be substantially lower than the total variance of the reporting population defined as \( \sum_{i=1}^{n} \frac{1}{n} (x_i - \bar{x})^2 \), where \( h \) indicates each stratum, \( x_i \) the interest rate for institution \( i \), \( \bar{x}_h \) the simple average interest rate of stratum \( h \), \( n \) the total number of institutions in the sample and \( \bar{x} \) the simple average of interest rates of all institutions in the sample.

on page 78, Annex II, paragraph 2 of Part 1(\( i \)), replace the formula with the following:

\[ \bar{x} = \left( 1 + \frac{\epsilon}{\bar{x}} \right)^n - 1; \]

on page 96, Annex III, footnote 1:

for:

\[ (\text{1}) \quad D = z_{\alpha/2} + \sqrt{\text{var}(\hat{\theta})} + z_{\alpha/2} \cdot \sqrt{\text{var}(\hat{\theta})}, \]

read:

\[ (\text{1}) \quad D = z_{\alpha/2} + \sqrt{\text{var}(\hat{\theta})} + z_{\alpha/2} \cdot \sqrt{\text{var}(\hat{\theta})}, \]

with \( D \) as the maximum random error, \( z_{\alpha/2} \) as the factor computed from the normal distribution or any suitable distribution according to the structure of the data (e.g. t-distribution) assuming a confidence level of \( 1-\alpha \), \( \text{var}(\hat{\theta}) \) as the variance of the estimator of parameter \( \theta \), and \( \text{var}(\hat{\theta}) \) as the estimated variance of the estimator of parameter \( \theta \).
