Source: Credit Suisse
USD: More downside, with political two way-risk

- Improvement in global growth momentum argues for further mild USD downside as CBs outside of the US shift hawkish
  - CS economists expect one more Fed hike in 2017, 2 in 2018. But they also expect strong economies outside the US, which limits scope for USD to benefit
  - Benign market response bodes well for currencies geared to global growth

- US politics dictate two-way risk for the USD:
  - Limited market expectations of successful US tax reform suggest USD could rally significantly if Administration were to introduce significant policy changes
  - Ongoing Mueller investigation is a source of uncertainty, would likely be USD negative if were to yield evidence of foul play

- FOMC composition in 2018 is a major unknown
  - 5 members of the FOMC (including the Chair) are up for nomination
USD: The dollar tends to weaken as the Fed hikes

- This largely reflects faster policy tightening outside of the US, in response to stronger global GDP growth

DXY indexed at 100 on day of first Fed rate hike in tightening cycle

Source: Credit Suisse, the BLOOMBERG PROFESSIONAL™ service
USD: The USD’s rate advantage is eroding vs G10 FX

- The USD top in Jan ’17 corresponds to peak US carry vs G10
- USD losing carry advantage as G10 central banks turn hawkish

Source: Credit Suisse, BEA, the BLOOMBERG PROFESSIONAL™ service
EUR: Bullish

- EURUSD forecast: 1.22 in 3m, 1.25 in 12m

- EUR strength is likely preventing markets from pricing in aggressive ECB tightening, potentially allowing the ECB to taper asset purchases before hiking without excessive concern about market “tantrums”

- Euro area growth appears to have entered a new phase of strong sustainable growth, inflation is still muted

- The BOP is still supportive and is likely to remain so in the long-term, especially as allocation to EUR by reserve managers remains low

- Italian elections remain a potential political tail risk, but less so in the light of the improvement in growth momentum
EUR: Diverging from rate differentials…and loving it!

- EURUSD has rallied above the level implied by rate differentials
- This reflects EUR strength hurting ECB tightening expectations,
- Is this a problem for EUR bulls? Not if the ECB approves of the mix of monetary conditions tightening this implies
EUR: ECB set to chart monetary policy path in October

- Our economists expect the ECB to detail the future path of QE at their October 26 meeting, with a step down to 40bn EUR per month beginning in January 2018

- We then expect a move to 20bn by June 2018, a full taper by end-Q3 2018 followed by a rate hike in Q418 / Q119

- Our analysis shows that euro-area growth has become less sensitive to exchange rate fluctuations, and is increasingly driven by domestic demand

- We think that the ECB is relatively comfortable with the current exchange rate, and this “green-lights” further EUR gains
EUR: The BOP remains supportive

- Germany and northern European countries continue to drive a large trade surplus
- The recycling mechanism via portfolio flows is alive and well
- The rebound in portfolio liabilities is potentially very supportive

Source: Credit Suisse, the BLOOMBERG PROFESSIONAL™ service
EUR: Under-owned by reserve managers

- EUR ownership by reserve managers never rebounded from the post Euro crisis dip
- The recent pick-up in global EM FX reserves is likely to provide an occasion to diversify into EUR assets

Source: Credit Suisse, the BLOOMBERG PROFESSIONAL™ service, IMF COFER
GBP: Bullish

- **EURGBP forecast:** 0.88 in 3m, 0.86 in 12m
- **GBPUSD forecast:** 1.386 in 3m, 1.454 in 12m

- The reorientation of the Bank of England’s reaction function away from growth, wage, and Brexit risks in favour of targeting FX and supply-side induced inflation opens the way for further GBP strength.

- The costs of currency depreciation now appear to exceed its benefits, with the BOE unlikely to stand in the way of further gains.

- We expect the probability of a negotiated transition period and soft Brexit over the medium term to rise, allowing the GBP to reverse some of its post-referendum undervaluation as underweight positions are unwound.
GBP: A weaker pound is forcing the BOE’s hand

- In the early stages of depreciation, policymakers may be unconcerned or welcoming, as this assists exports and reduces disinflationary tendencies.
- But eventually, a persistently weak currency can boost inflation expectations too far (as was the case in Mexico and Russia).
GBP: Softer Brexit to reverse undervaluation

- We expect post-referendum fears of “terms of trade” shock to GBP to ease as the path to soft Brexit becomes clear
- Longer term undervaluation of the GBP is then unjustified
- Risk reversals may then begin pricing more premium for GBP calls

Source: Credit Suisse, the BLOOMBERG PROFESSIONAL™ service
CHF: Bearish, with further downside risks

- **EURCHF forecast**: 1.16 in 3m, 1.18 in 12m
- **USDCHF forecast**: 0.951 in 3m, 0.944 in 12m

- Despite YTD depreciation, the CHF remains fundamentally overvalued

- The expected path of core inflation remains weak, with disinflationary effects from sub-groups outweighing exchange rate pass-through

- Strengthening global growth outlook increases the opportunity cost of holding CHF, as global rates accelerate higher

- Accumulated stocks of foreign assets in Switzerland risk an acceleration in capital outflows
CHF: Bulls bereft of support

- Domestic stakeholders (SNB, exporters, residents holding foreign assets) are aligned in their opposition to a stronger CHF
- Fundamental overvaluation persists, despite YTD depreciation vs the EUR

Source: Credit Suisse, the BLOOMBERG PROFESSIONAL™ service, Swiss National Bank
CHF: Capital outflows may have only just begun

- Rapid CHF depreciation suggests an unwinding of Swiss hedges on overseas assets
- Gross NIIP balances suggest more unwinding can come, counteracting a persistent current account surplus

Accumulated Swiss assets may see hedge shifts due to depreciation expectations

Gross foreign investments are sizeable compared to GDP

Credit Suisse Latin America Corporate Credit Research may provide views on the Latin American issuers and issues mentioned in this report but does not assign formal investment ratings or recommendations.

Structured Securities, Derivatives, Options, and Futures Disclaimer

General risks: Structured securities, derivatives, options (OTC and listed), and futures (including, but not limited to, commodity, foreign exchange, and security futures) are complex instruments that are not suitable for every investor, may involve a high degree of risk, may be highly illiquid, and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved.

There is a risk of unlimited, total, or significant loss resulting from the use of these instruments for trading and investment.

Before entering into any transaction involving these instruments, you should ensure that you fully understand their potential risks and rewards and independently determine that they are appropriate for you given your objectives, experience, financial and operational resources, and other relevant circumstances. For options, ensure that you have read the Options Clearing Corporation's disclosure document, available at http://www.optionseducation.com/comp/derivatives/oei/oei.pdf.

Risk of losses on options: The maximum potential loss on buying a call or put option is the loss of the total premium paid. The maximum potential loss on selling a call option is unlimited. The maximum potential loss on selling a put option is substantial and may exceed the premium received by a significant amount.

Risk of losses on futures: The maximum potential loss on buying a futures contract is the loss of the value of the contract and can be amplified by leverage. The maximum potential loss on selling a futures contract is unlimited.

OTC options and other derivatives: In discussions of OTC options and other derivatives, the results and risks are based solely on the hypothetical examples cited, actual results and risks will vary depending on specific circumstances. Investors are urged to consider carefully whether these products, as well as the products or strategies discussed herein, are suitable to their needs. While some OTC markets may be liquid, transactions in OTC derivatives may involve greater risk than investments in exchange-listed derivatives because there is no exchange market on which to liquidate a position and it may be very difficult to assess the value of the position because bid and offer prices need not be quoted.

Structured products: These products often have a derivative component. As a result, they carry only the risk of loss of principal, but also the possibility that all appreciation the investor will own the reference asset at a depressed price. Even if a structured product is listed on an exchange, active and liquid trading markets may not develop and the expected value of the structured product may be thinly traded.

Taxation: Because of the importance of tax considerations for many option and other derivative transactions, investors considering these products should consult with their tax advisors as to how taxes affect the outcome of contemplated options or other derivatives transactions. You should consult with such tax, accounting, legal or other advisors as you deem necessary to assist you in making these determinations.

Transaction costs: Such costs may be significant in option strategies calling for multiple purchases and sales of options and other derivatives, such as spreads and straddles. Commissions and transaction costs may be a factor in actual returns realized by the investor and should be taken into consideration.

Trading on margin: Margin requirements vary and should be determined before investing as they can impact your profit potential. If the market moves against your position, you may be called upon by your broker to deposit additional margin funds, on short notice, in order to maintain your position. If you do not provide the required funds within the time required by your broker, your position may be liquidated at a loss, and you will be liable for any resulting deficit in your account.

Further information: Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data in this material will be supplied upon request. Any trade information is preliminary and not intended as an official transaction confirmation. If you have any questions about whether you are eligible to enter into these transactions with Credit Suisse, please contact your sales representative.

References in this report to Credit Suisse include all of the subsidiaries and affiliates of Credit Suisse operating under its investment banking division. For more information on our structure, please use the following link: https://www.credit-suisse.com/who-we-are. This report may contain material that is not directed to, or intended for distribution to or use by, any person or entity other than those who are not residents of, or located in any jurisdiction where such provision of material, or its receipt by such recipient is unlawful or prohibited by law. Credit Suisse and/or its affiliates reserve the right at any time to alter or withdraw such material. No representation or warranty, express or implied, is made regarding the accuracy, relevance or completeness of any information presented herein. Some of the material, information and related services contained herein may be considered private or confidential and may not be released or distributed to any other party, without the prior written consent of Credit Suisse. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor or financial professional before making any investment decisions. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate for your individual circumstances, or otherwise constitutes a personal recommendation to you. CS does not advise on the tax consequences of investments and you are advised to contact an independent tax advisor. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have, and may in the future, other communications that are inconsistent with, or may contradict statements, conclusions or information from this communication in the present report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication of future performance, or no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report may reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuations that may have a positive or adverse effect on the price of any such securities or financial instruments. Investors in securities such as ARPs, the values of which are influenced by currency volatility, effectively assume this risk. Financial instruments are complex products, typically involving a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be adversely affected by economic conditions (including, but not limited to, interest rates, exchange rates, market values of underlying assets), volatility, market breadth, liquidity, market impact, volatility, margin requirements and volatility, and the credit quality of any underlying credit. All sales and purchases of structured products sold by CS should be considered on a risk versus return basis. An investor interested in purchasing a structured product should conduct his own investigation and analysis of the product and consult with his own professional advisors as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in value because of volatility when investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, and in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such hyperlinks (including addresses of CS’s own website materials) are solely for your convenience and information and the content of any such website does not in any way form part of this document. Accessing such websites (including following any hyperlink through this report or CS’s website pages) shall be at your own risk. In respect of clients within Australia, Credit Suisse AG (Kuala Lumpur) Branch has been registered as an Australian financial services licensee under the Corporations Act 2001 (“ASX”). Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Di Bhd, to whom they should direct any queries on +603 2732 2020. This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (such persons as defined in the Financial Advisers Regulations) (each acting as an institutional investor accredited investor, expert investor or overseas investor, as applicable). Credit Suisse, any core company or any associate of CS may be the only market maker in such investments. Chapter 11 of the Securities Act of 1933 (the “Securities Act”), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore branch may provide to you. This information is distributed by Credit Suisse (SFC Branch), duly licensed and regulated by the Financial Services Authority (“FSA”). Related financial services or products are only made available to professional Clients or Market Counterparties, as defined by the DFSA, and are not intended for any other persons. Credit Suisse (SFC Branch) is located on Level 9 East, The Gateway Building, DFC, Dubai, United Arab Emirates. This report may not conform to Singapore disclosure requirements. In jurisdictions where CS is required to be licensed or registered to trade securities, transactions will be conducted subject to applicable laws and regulations and may require the obtaining of any necessary exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing laws permit otherwise. U.S. customers wishing to effect a transaction should do so only through Credit Suisse Financial Services (USA) LLC in the United States. Research provided to non-personal and institutional investor customers should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside the UK or to other matters which are not authorised by the Prudential Regulation Authority or Financial Conduct Authority or the Prudential Regulation Authority or in respect of which the protections of the Financial Services Compensation Scheme for Credit Suisse Financial Services (UK) Limited may not be available, and further details as to where this may be the case are available upon request in respect of this report. CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions and trades, and entering into transactions on a principal basis on behalf of a municipality, if CS determines in its sole discretion that such transactions are in the best interests of the municipality. CS may provide municipal services to municipalities that are not "retail" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act, as it is providing financial services or related information solely on an arm’s length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for the provision of advice to the municipality. Municipalities should consult with their usual legal advisors regarding the content of such services provided by CS. In the event of an unfunded broker dealer, municipal advisor, or investment advisor for the purpose of obtaining or retaining engagements with Municipal Products, the issuance of municipal Products, or of an investment advisor to provide investment advisory services to or on behalf of a municipality, the person or entity responsible for such engagement should conduct a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. Principal is not guaranteed. Commission is the commission rate or the amount agreed with a customer when setting up an account or at any time after that.
