

T+1 Corporate Events Adaptation Plans – Overview

Background

In October 2027, the way corporate events are processed will change as a result of the shortening of the settlement cycle – the time between the trade date (T) and settlement (T+X). The change in the standard settlement cycle from T+2 to T+1 shortens the time between the key dates of a corporate event, affecting the determination of eligibility and the timeline for submitting instructions in elective corporate events. This requires issuers, intermediaries and investors to adjust their operations accordingly.

In preparation for this move, central securities depositories (CSDs) in AMI-SeCo markets have developed [Adaptation Plans](#) describing the necessary changes and associated milestones for the implementation of the corporate events processes included in the [T+1 Corporate Events Harmonised Implementation Guide](#).

In these plans, respondents:

- indicate whether the business process is fully implemented ("Implemented"), or whether changes are required ("Adaptation required") and;
- provide a deadline for completing each key activity to comply (Implementation Milestones).

This document provides an overview of the information included in the Adaptation Plans received from 38 AMI-SeCo markets as of June 2026. It is structured as follows:

- **Section 1** provides a description of the implementation milestones included in the Adaptation Plans.
- **Section 2** provides information on the implementation of key dates standards.
- **Section 3** provides information on the implementation of market claims standards.
- **Section 4** provides information on the implementation of transformations standards.
- **Section 5** provides information on the implementation of buyer protection standards.
