T2 DWH brainstorming on how to increase user interaction

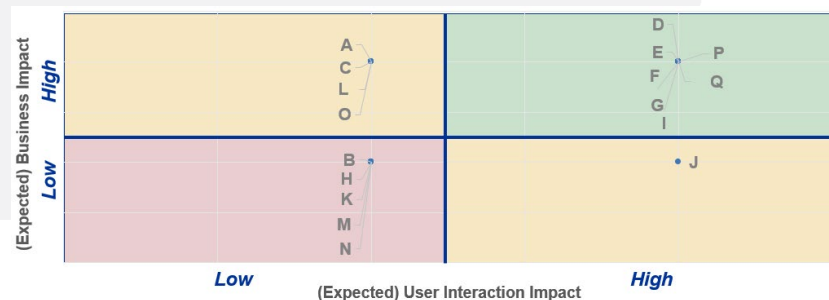

T2-CG meeting
11 Jun 2026

target | T2
services

Background

- T2 DWH usage statistics show a positive upward trend
- Despite progress, there is potential to further boost T2 DWH user interaction
- T2-WG and T2-CG consultations were launched in order to collect ideas and proposals that could increase user interaction with T2 DWH
- Outcome of this exercise has been approved by T2-WG
- **This presentation provides an overview of all the ideas and proposals collected via both consultations as well as an assessment of all items taking into account business needs and technical complexity**

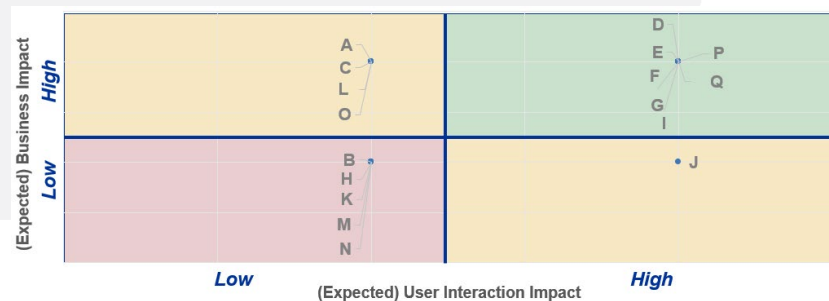

Overview of proposals

- **Pre-defined reports**

- A. TRN01 and TRN02 – Enable running/scheduling the report with a dynamic prompt "Last Business Day"
- B. STA01 –TIPS and T2S accounts to be included in the report
- C. STF01 – Co-managees accounts to be included in the report
- D. TRN04 and BIL06 – Enable access to payment banks
- E. MIR01 – Report shows only start date and duration of the minimum reserve period; add end date to enable use in liquidity management (A2A mode) applications

Overview of proposals

- **User-defined reports**

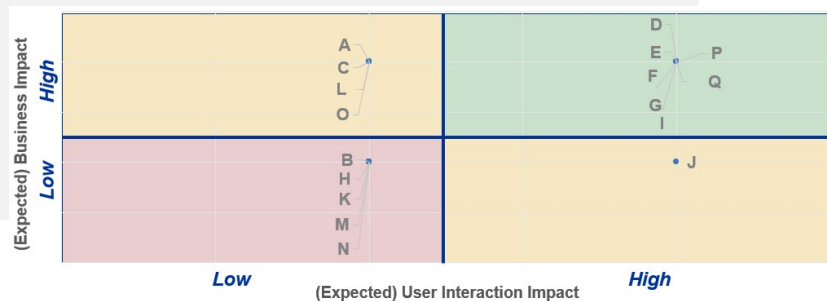

F. NCBs to create user-defined reports and share with participants

G. Participants to create user-defined reports for themselves

- **Data scope**

H. Inclusion of all data for T2S and TIPS in the T2 DWH

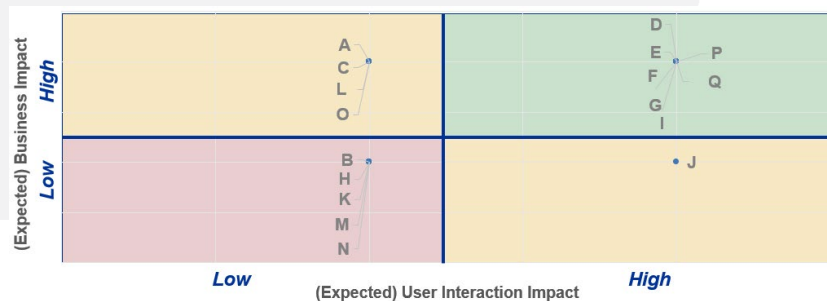

Overview of proposals

- **DWH GUI**

- I. Show predefined reports on the landing page or ensure quick access to improve accessibility
- J. Add a clearly visible link to the DWH UHB
- K. Simplify user defined report creation by making the GUI more user-friendly
- L. Simplify user defined report creation by providing a visual guide

Overview of proposals

- **General**

M. Extension of the report output formats, adding JSON or YAML

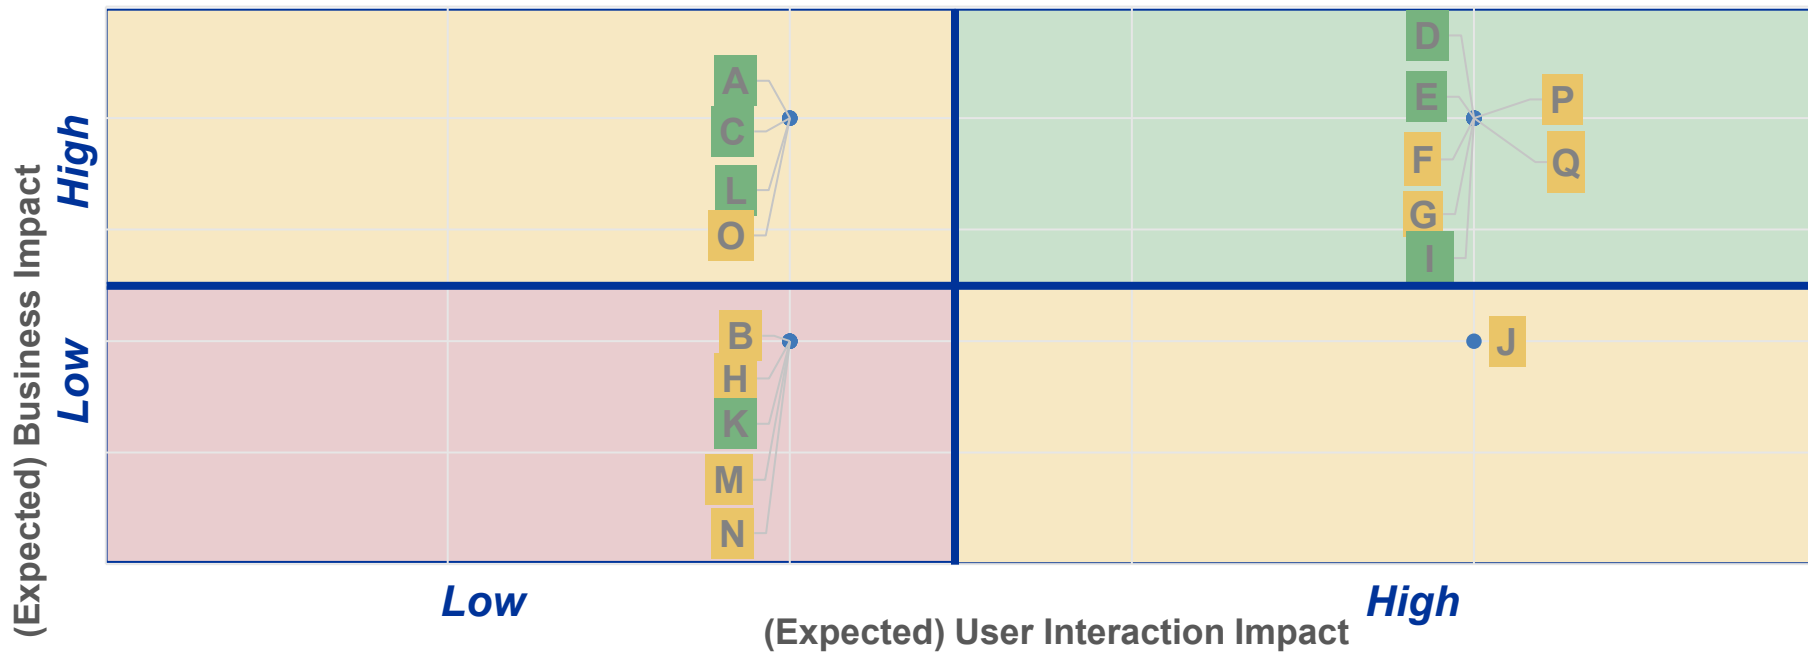

N. Move towards API-based architecture (in the long-term)

O. Disabling the automatic validation of reports when opening a report in Edit mode (it ends always with a generic error)

P. Introduce loading or progress indicator on the page for users to know how far their request has progressed

Q. Allow forwarding of subscribed pre-defined reports and forwarding via e-mail (not only A2A)

Proposal assessment matrix – considering 4CB complexity analysis

Way forward

- **Move forward** via detail assessment of one DWH change request
 - **A** - TRN01 and TRN02 – Enable running/scheduling the report with a dynamic prompt "Last Business Day"
 - **C** - STF01 – Co-managees accounts to be included in the report
 - **D** - TRN04 and BIL06 – Enable access to payment banks
 - **E** - MIR01 – Report shows only start date and duration of the minimum reserve period; add end date to enable use in liquidity management (A2A mode) applications

- **Move forward** via DWH training or via DWH training material
 - **I** - Show predefined reports on the landing page or ensure quick access to improve accessibility
 - **K** - Simplify user defined report creation by making the GUI more user-friendly
 - **L** - Simplify user defined report creation by providing a visual guide

- Remaining ideas and proposals are not to be pursued

- Monitoring of T2 DWH usage to continue based on T2 DWH usage statistics
