4		General comment	General comment	We don't have any remarks at this point in time but for sake of simplicity wouldn't it be an option to only reuse the specification T2S for further clarification of the GUI? There are so many similarities to T2S and it would perhaps be enough to set some links from the CRDM TIPS UHB to the corresponding T2S-Documents. The T2S UHB could likely serve as a base for a slimmer CRDM TIPS UHB.	Clarification	No specific feedback to be provided to the CG.
