

# Billing Processes Adaptation Plan

## Euroclear France

Activity	Billing Processes
<b>Plan submitted by</b>	Euroclear France
<b>NSG</b>	France
<b>Date</b>	February 2020

### Background

The Adaptation Plan provides information on the changes which will be implemented to meet the AMI-SeCo Standards for Billing Processes which form part of the Single Collateral Management Rulebook for Europe (SCoRE). Full details of the Billing Processes Standards can be found on the [ECB website](#).

The document is structured as follows: Section 1 (Cover Letter) provides a high-level summary of the changes in order to implement the AMI-SeCo Standards. Section 2 (Adaptation Plan Table) then provides a more detailed overview per Standard covering a feasibility assessment and the implementation milestones.

### 1 Cover Letter

The Euroclear group is currently deploying a new Oracle-based billing solution. The migration of Euroclear France, together with the other ESES CSDs, is planned to commence towards the end of 2020 and complete in the first half of 2022. The migration project plan has been adapted to ensure compliance with the new standards, including upgrade of some processes and production of the ISO 20022 billing report. We understand that the format itself is still under development and we will have to perform a more detailed assessment when the final format will be known.

This plan will allow to deliver technical compliance around the middle of the testing period, which, in our view, provides enough time to complete all required testing ahead of the November 2022 go-live date.

At the same time, a review of the internal processes is required to be able to deliver the invoice report one week before the current schedule. This will be made easier thanks to the extra level of automation and control delivered by the new solution. Contractual payment terms will have to be reviewed by clients in scope.
