

Billing Processes Adaptation Plan

SKDD - Central Depository & Clearing Company Inc.

Activity	Billing Processes
Plan submitted by	SKDD Central Depository & Clearing Company Inc.
NSG	Croatia
Date	April 2020

Background

The Adaptation Plan provides information on the changes which will be implemented to meet the AMI-SeCo Standards for Billing Processes which form part of the Single Collateral Management Rulebook for Europe (SCoRE). Full details of the Billing Processes Standards can be found on the [ECB website](#).

The document is structured as follows: Section 1 (Cover Letter) provides a high-level summary of the changes in order to implement the AMI-SeCo Standards. Section 2 (Adaptation Plan Table) then provides a more detailed overview per Standard covering a feasibility assessment and the implementation milestones.

1 Cover Letter

AMI-SeCo Billing Processes Standards - Adaptation Plan has been realized for the following Standards:

Standard 2 Harmonised billing cycles that ensure providing billing information on a monthly basis and billing periods from the first of the month to the last day of the month inclusive.

Standard 3 Cut-off date for provision of billing information by (I)CSDs to their clients no later than the 8th (or next business day) of the month for fees related to depository services and/or triparty collateral management services.

Standard 4 Harmonised dates for payment of fees to (I)CSDs which translates to cash payments (I)CSDs being processed on the 15th (or next business day) of each month for fees related to depository services and/or triparty collateral management services will be adopted following some minor changes in the system, reason being that as of right now the mentioned payments to CDCC are being processed on the 10th (or next business day) of the month.

Standard 1 which refers to implementation of ISO 20022 messages for billing processes has yet to be implemented for the number of reasons, one of them being that CDCC is handling corporate actions or billing processes for that matter, through ISO 15022 messaging while awaiting entering T2S which mandates adoption of ISO 20022 messaging.
