Cover Note
Publication of the final User Handbook (UHB) documents for the T2 Service

1. Introduction 2
2. Enhanced Contingency Solution (ECONS II) User Handbook R2024.JUN 3
3. Central Liquidity Management (CLM) User Handbook R2024.JUN 4
5. Next UHB versions 6
1. Introduction

The T2 User Handbooks (UHBs) are user manuals for the graphical user interface (GUI) and focus on the user-to-application (U2A) communication mode for central banks, payment banks, and ancillary systems.

They describe the full range of functionalities available in U2A mode and provide detailed reference information on all GUI screens and step-by-step instructions for typical workflows.

The following UHB documents have been published:

- The UHB for the Service Component *Enhanced Contingency Solution II (ECONS-II)* R2024.JUN provides information on the GUI screens in relation to the liquidity management and payments processing in contingency mode.

- The UHB for the Service Component ‘Central Liquidity Management’ (CLM) R2024.JUN provides information on the GUI screens used in relation to the processing of cash transfers and messages, CLM liquidity management, credit operations, central bank operations, CLM and RTGS Reference Data queries, CLM task queue administration, and CB/CLM liquidity monitoring.

- The UHB for the Service Component ‘Real-Time Gross Settlement’ (RTGS) R2024.JUN provides information on the GUI screen functions used in relation to the processing of cash transfers and messages, RTGS liquidity management, Ancillary System procedure processing, CLM and RTGS Reference Data queries, RTGS task queue administration, and liquidity monitoring.
2. Enhanced Contingency Solution (ECONS II) User Handbook R2024.JUN

The changes since the last UHB are reported in the Change Request T2-0138-SYS which is published on the ECB website.
3. Central Liquidity Management (CLM) User Handbook R2024.JUN

The UHB is structured as follows:

- UHB Chapters 1, 2, 3, 4 provides the end-user with an introduction and overview of the UHB layout, guidance on the GUI setup, and a description of the standard GUI navigation features and screen elements.
- UHB Chapter 5 outlines in a detailed manner the features of each GUI screen including information on context of usage, screen access, privileges, references and the descriptions of fields, drop down values and buttons on the respective screens.
- UHB Chapter 6 provides step-by-step instructions on how end-users may carry out actions in the GUI. It gives end-users valuable information on how to complete a use case successfully and helps them in verifying the result.
- UHB Chapter 7 provides an annex of error codes and supporting descriptions that the end-user could encounter during testing of the software as well as a list of all the U2A privileges needed to access the GUI screens.

The changes since the last UHB are reported in the Change Request T2-0136-SYS which is published on the ECB website. In addition, changes since the last UHB are reported in the Change Requests T2-0087-URD and T2-0114-URD.

The UHB is structured as follows:

- UHB Chapters 1, 2, 3, 4 provides the end-user with an introduction and overview of the UHB layout, guidance on the GUI setup, and a description of the standard GUI navigation features and screen elements.
- UHB Chapter 5 outlines in a detailed manner the features of each GUI screen including information on context of usage, screen access, privileges, references and the descriptions of fields, drop down values and buttons on the respective screens.
- UHB Chapter 6 provides step-by-step instructions on how end-users may carry out actions in the GUI. It gives end-users valuable information on how to complete a use case successfully and helps them in verifying the result.
- UHB Chapter 7 provides an annex of error codes and supporting descriptions that the end-user could encounter during testing of the software as well as a list of all the U2A privileges needed to access the GUI screens.

The changes since the last UHB are reported in the Change Request T2-0136-SYS which is published on the ECB website. In addition, changes since the last UHB are reported in the Change Requests T2-0087-URD and T2-0114-URD.
5. Next UHB versions

All UHB versions will be updated based on Change Requests approved by the T2-WG and the Market Infrastructure Board. Change Requests relevant for the UHBs and with impact on market participants will be published on the ECB Website.

As a result, at the time of publication, the content updates of UHBs relevant for market participants will already be known to the market.

The next version of the UHB documents for T2 R2024.NOV will be published in the second half of 2024.
