1 Introduction

This document contains the test approach regarding the T2 Mandatory testing and a detailed description of test cases for the T2 participants.

1.1 Approach

The set of test cases in this document are mandatory for directly connected T2 Participants. T2 Participants constitutes Payment Banks and Ancillary Systems.

T2 Participants should progress logically through the tests, commencing with the CRDM related activities, then progressing to the CLM and RTGS related activities. All the evidence must be gathered and attached in the certification testing template. The recommendation is that CRDM and reference data related tests are carried out during the Pre-Migration testing if possible.

Please note that these tests are not an exhaustive set of test cases for T2 Participants. If relevant, the National Central bank may provide to the participants a set of additional authorisation test cases to be carried out. The tests must be carried out in the T2 Pre-production Test environment (known informally as UTEST). The test cases have been selected in order to evaluate the participants’ capability to perform the basic functions of the system. It is the responsibility of each T2 participant to ensure that all functionalities related to their business will be tested. The tests can be performed in two-eyes mode, but evidence provided including four-eyes mode screenshots will be accepted. In some cases, cooperation is required between participants to prove a test case e.g. between Ancillary system and Payment bank.

The T2 User Testing Terms of Reference indicates the period from 1 December 2021 to 27 January 2023 as dedicated to mandatory testing. During the User Testing period the participants will be asked to report on their progress at monthly intervals. The mandatory tests must be completed and verified before the end of T2 User Testing in order for the participant to progress to T2 production.

The Participants will submit the evidence (screenshots and files) to their National Service Desk, which will confirm the success of the testing after the successful evaluation of the provided evidence.

---

1 Only the co-manager is responsible for executing mandatory test cases. Co-managed participants are exempt from the mandatory test cases and fall under the umbrella of the co-manager. This also means that if the co-manager does not supply evidence of the completed test cases, both co-manager and co-managed participant will be reported as not having completed the test cases. The co-manager only has to provide one set of mandatory test cases from one party (this can be its own party). However, if a test case applies to the co-managed participant and not the co-managers party itself, the co-manager must provide evidence of the mandatory test case that would be applicable to the co-managed participant (e.g. the co-manager does not use a specific message for its own party but it is used for the co-managed party. In this case the co-manager must provide evidence for completion of such test case).
1.2 Co-managers and co-managees

The MTRSG has agreed that co-managers will be responsible for the performance of mandatory test cases on behalf of their co-managees.

If the co-manager co-manages one or more co-managees (both co-manager and all co-managees, under the responsibility of the same central bank) then the submission of test case evidence to the co-manager NCB related to just one of these co-managees will be sufficient. In any case, the co-managee will report to its NCB (if requested) about its readiness in the context of the testing phase (User testing status, completion percentage of mandatory test cases, expected completion date, etc.)

If a co-managee is co-managed by a co-manager in a foreign country then this co-managee must request the evidence from his co-manager and submit it to his own NCB (if requested by its NCB). It is the responsibility of the co-manager for a co-managee in a foreign country to carry out any locally mandated tests (e.g. authorisation tests) by the NCB of the co-managee.

The NCB of a co-manager may also share the evidence submitted in Darwin to allow other NCBs to access it should they wish.

1.3 Test case template methodology

The table below describes the elements included in the test case template.

<table>
<thead>
<tr>
<th>Test Case ID</th>
<th>T2_TC_(RTGS/CLM), AH/AS followed by an ID number for identification purposes.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Test case name</td>
<td>Descriptive name of the test case</td>
</tr>
<tr>
<td>Relevant for (actor)</td>
<td>(CLM/RTGS) Account Holder / Ancillary System (AS)</td>
</tr>
<tr>
<td>Domain</td>
<td>Indicates the TARGET Services domain e.g. CRDM / CLM / RTGS in which the test case is carried out.</td>
</tr>
<tr>
<td>Sub Domain</td>
<td>Possible values include: CRDM_GUI, Liquidity transfer order (LTO), Query (QUER), Minimum Reserve (MR), Maintain Credit Line (MCL), Credit Transfer Order (CTO), Ancillary System Procedures x (ASP A/B/C/D/E)</td>
</tr>
</tbody>
</table>
### Input mode
- U2A or A2A (the user chooses one of the two input modes corresponding to the input mode that will be used in Production. U2A (the test case can only be carried out in U2A) A2A (the test case can only be carried out in A2A)

### Mandatory
- Yes or Conditional (COND - any exempt or specific conditions to be considered)

### Detailed Description
- Short description followed by the required step to perform the test cases first in U2A then in A2A (where applicable)

### Preconditions/Details
- Preconditions required to carry out the test case

### Expected results
- The expected and required outcome of the test case in U2A and A2A (if applicable)

### Test evidence
- Description of the required test evidence for the U2A and A2A (if applicable) execution.

### Relevant Documentation
- References to the User Detailed Functional Specifications (UDFS), User Handbook (UHB) and/or the Pre-Migration Schedule (PMS).

### Related privileges
- Required privileges to carry out the test case.

<tr>
<td>Detailed Description</td>
<td>This test case describes the steps required to carry out a CLM liquidity transfer to an RTGS DCA.</td>
</tr>
<tr>
<td>- U2A</td>
<td></td>
</tr>
<tr>
<td>1. Select Liquidity → Liquidity Transfer – New Screen</td>
<td></td>
</tr>
<tr>
<td>2. An authorised user can enter a liquidity transfer order to transfer liquidity from an MCA to a RTGS DCA through the New Liquidity Transfer Order page in GUI application.</td>
<td></td>
</tr>
<tr>
<td>Step</td>
<td>Description</td>
</tr>
<tr>
<td>------</td>
<td>-------------</td>
</tr>
<tr>
<td>3.</td>
<td>The user fills in all fields correctly and clicks on 'Submit' button.</td>
</tr>
<tr>
<td>4.</td>
<td>The user is requested to confirm the data and a success message appears.</td>
</tr>
<tr>
<td>5.</td>
<td>The liquidity transfer order is created and settled. There is also a 'Reset' button available to cancel the modification.</td>
</tr>
</tbody>
</table>

**Preconditions/Details**

- The debtor Party needs to be a CLM account holder and needs to be authorised to debit the MCA.
- The user has access to the New Liquidity Transfer order page (U2A only)
- Message subscription exists for the credit notification (A2A only)
- Sufficient liquidity is held (unreserved) to effect settlement

**Expected results**

- Camt. 054 received if configured (applicable for U2A and A2A)
- **U2A**
  - The LT is visible in the Query Cash Transfers/ List Cash Transfers/ Details of cash transfers
- **A2A**
  - The processing continues with 'Submit to settlement'.
  - The liquidity transfer order is correctly settled and the submitting actor receives a camt.025 with the code value SSTS (SettlementStatus).
  - To notify the settlement, the creditor receives a camt.054.001.08 BankToCustomerDebitCreditNotification with local instrument (LIIE)

**Test evidence**

- **U2A**: A Liquidity Transfer order with status “settled” can be visible from one of the following screen: Query Cash Transfers/ List Cash Transfers/ Details of cash transfers. Therefore, a screenshot of the liquidity transfer with status “settled” could be requested from “Query Cash Transfers” screen/ “List Cash Transfers” screen or “Details of cash transfers” screen
- **A2A**: Copy of the camt.025 (A2A)

**Relevant Documentation**

</tr>
<tr>
<td></td>
<td>5. The liquidity transfer order is created. There is also a ‘Reset’ button available to cancel the modification.</td>
</tr>
<tr>
<td>A2A</td>
<td>1. The participant sends a camt.050 (to transfer liquidity from an MCA to a MCA which passes technical and business validation.</td>
</tr>
</tbody>
</table>
### Preconditions/Details

The debtor Party needs to be a CLM account holder and needs to be authorised to debit the MCA.

Message subscription exists for the camt.054 credit notification (optional)

MCAs belong to the same Liquidity Transfer Group

### Expected results

**U2A:**

The LT has settled (with cash transfer status “settled” and is visible in the Query Cash Transfers/ List Cash Transfers/ Details of cash transfers. The debited and credited MCA received a Camt.054 (if configured in CRDM).

**A2A:**

The liquidity order transfer is not earmarked due to blocking and the processing continues with ‘Submit to settlement’.

The liquidity transfer is correctly settled and the sender receives a camt.025 with the code value SSTS (SettlementStatus).

To notify the settlement, the creditor receives a camt.054.001.08 BankToCustomerDebitCreditNotification with local instrument (LIIA).

### Test evidence

**U2A:** A Liquidity Transfer order with status “settled” can be visible from one of the following screen: Query Cash Transfers/ List Cash Transfers/ Details of cash transfers. Therefore, a screenshot of the liquidity transfer with status “settled” could be requested from “Query Cash Transfers” screen/ “List Cash Transfers” screen or “Details of cash transfers” screen

**A2A:** A copy of the camt.025

</tr>
<tr>
<td>Mandatory</td>
<td>Yes</td>
</tr>
</tbody>
</table>

**Detailed Description**

The purpose of this test case is to verify that the user can query the available liquidity of its CLM accounts.

**U2A**

1. Select Liquidity → CLM Cash Account Liquidity – Query Screen → [Submit] → CLM Cash Account Liquidity – Display Screen
2. From the cash account liquidity query screen, the user can search the available liquidity on one, many or all accounts that a user is authorised to see through U2A interface.
3. The users can query within their data scope, which is determined by the Party BIC.

**A2A**

1. The user sends a GetAccount camt.003 “Query request message - available liquidity CLM query” to CLM.
2. The user receives a ReturnAccount camt.004 in response. “Query response for business data - available liquidity CLM query” with the requested balance information according to the specified search criteria.

**Preconditions/Details**

A party with accounts in CLM and RTGS should exist.

**Expected results**

The user can see the overall liquidity of the selected account from the search criteria.

**Test evidence**

<tr>
<td>Detailed Description</td>
<td>This test case describes how to make an overnight deposit with the respective central bank of a CLM account holder.</td>
</tr>
<tr>
<td></td>
<td><strong>U2A:</strong></td>
</tr>
<tr>
<td></td>
<td>1. Select Liquidity → and click on the sub-menu entry ‘New Liquidity Transfer’</td>
</tr>
<tr>
<td></td>
<td>2. Enter the account number of the debit account. This can be the account number of the MCA, the RTGS DCA, the TIPS Account or the RTGS sub-account of the CLM account holder requesting the overnight deposit.</td>
</tr>
<tr>
<td></td>
<td>3. Enter the account number of the credit account. This has to be the account number of the Overnight Deposit Account owned by the Central Bank and opened in the name of the respective CLM account holder requesting the overnight deposit.</td>
</tr>
</tbody>
</table>
### 4. Enter the amount that is to be transferred and provide an end-to-end identification for the liquidity transfer order

### 5. Click on the 'Submit' Button in order to submit the liquidity transfer order.

#### A2A

1. The camt.050 message is sent by a payment bank to CLM to fund its own OD account.

### Preconditions/Details

- Sufficient liquidity on the account to be debited.
- The account holder opted to receive a confirmation message camt.054.
- The CB has created a separate overnight deposit account per monetary policy counterparty using the overnight deposit functionality.

### Expected results

- **U2A**: notification area shows whether the submission of the data has been completed
- **A2A**: Successful camt.054 is received

### Test evidence

- **U2A**: screenshot of the notification area after submitting the liquidity transfer order or the screenshot of the liquidity transfer order with status “settled” that can be requested from “Query Cash Transfers” screen, “List Cash Transfers” screen or “Details of cash transfers” screen
- **A2A**: copy of the successful camt.025

</tbody>
</table>
| Detailed Description | This test case describes the steps required to carry out a new liquidity transfer order from RTGS.  
U2A  
1. Select Liquidity → Liquidity Transfer – New Screen  
2. Enter the required details and press “Submit”.  
A2A  
1. The participant sends a camt.050 (to transfer liquidity from an RTGS DCA which passes technical and business validation. |
| Preconditions/Details | Both sending and receiving accounts exist and are active  
The sender has subscribed to the relevant messages  
Respective privileges have been granted to the sender.  
RTGS DCAs belong to the same Liquidity Transfer Group (applicable if receiving account is an RTGS DCA) |
| Expected results | The DCA of the recipient is credited and senders accounts is debited.  
A camt.025 message is returned by RTGS. |
### Test evidence

**U2A:** screenshot of the settled cash transfer.
The user can verify the liquidity transfer order by going to Cash Transfers and Messages → Cash Transfers – Query Screen → [Submit], then clicking on the arrow icon, the ‘Cash Transfers – List Screen’ to expand the list to view the details.

**A2A:** Copy of the message (camt.025) returned by RTGS

<td>CTO</td>
</tr>
<tr>
<td><strong>Input mode</strong></td>
<td>A2A</td>
</tr>
</tbody>
</table>
| **Mandatory** | Conditional  
Required for A2A users. |
| **Detailed Description** | The camt.029 is used to negatively answer a recall message. Debtor does not get the funds back. The process is initiated by a participant A sending a payment order to recipient B followed by a recall payment message (camt.056). Participant B then sends a camt.029 in response denning the payment recall. RTGS then forwards the reply to the RTGS Account Holder (A) that requested the recall. |
The objective of this test case is for the participant A to verify and confirm the receipt of camt.029 message.

**Preconditions/Details**
- Participant A has sent a payment order to Recipient B.
- Participant A has sent a PaymentCancellationRequest camt.056 message
- Participant B has responded to the recall message with a ResolutionOfInvestigation camt.029 message rejecting the request
- Participant A has subscribed to the relevant notification messages

**Expected results**
- A "Payment Acceptance recall Confirmation Notification" / Receipt (camt.025) is created and sent to the actor that sends the recall response.
- ResolutionOfInvestigation camt.029 message passes technical validation and sends the "Counterparty payment recall rejection" / ResolutionOfInvestigation (camt.029) to the recall request submitting actor.

**Test evidence**
- Copy of the received camt.029 message

### Detailed Description

Procedure C: Transfer order on sub-accounts:

This test describes the AS settlement procedure C whereby an AS settlement bank dedicates liquidity for the settlement of AS transfer orders from a specific ancillary system. They achieve this by allocating the needed liquidity to a specific sub-account. AS settlement procedure C uses a mandatory procedure (triggered by RTGS event “Execution of standing orders in RTGS” of new business day) and allows ancillary systems to execute optional procedure(s) (the ancillary system or CB on behalf sends a message (ReturnGeneralBusinessInformation (camt.021)) indicating the start of the optional procedure.

### Preconditions/Details

One or more sub-accounts created by AS settlement bank

Required liquidity allocated to sub-account

The AS has an AS technical account

### Expected results

All individual orders are settled against the technical account of the AS
RTGS processes all credits. The AS settlement banks are informed via a credit notification (BankToCustomerDebitCreditNotification (camt.054)) on an optional basis.

After all AS transfers have been settled the ancillary system (or the relevant CB on its behalf) receives a notification (ASInitiationStatus(pain.998), confirming the settlement of the entire AS batch message.

</tr>
<tr>
<td>Input mode</td>
<td>A2A</td>
</tr>
</tbody>
</table>
| Mandatory | Conditional  
Required for AS using settlement procedure E |
| Detailed Description | Procedure E: Bilateral settlement  
With the AS settlement procedure E, Ancillary systems can benefit of the bilateral settlement of simultaneously sent debits and credits that shall be processed independently from each other.  
1. An Ancillary System sends a pain.998_TransferInitiation message which passes the technical validation. |
| Preconditions/Details | An Ancillary System, with proper privileges and using procedure E, has sent a pain.998_TransferInitiation message which has passed the technical validation.
All accounts belong to the same Settlement Bank Account Group.
Appropriate subscription for camt.054 was set up by at least one Settlement Bank.
RTGS UDFS (section 5.4.5) it is recommended to use a dedicated technical account for procedure E for segregation purposes. |
| Expected results | The pain.998_TransferInitiation message passes the business validation and it is submitted to settlement.
During the process "Perform standard RTGS settlement" the AS transfer order is settled so the AS receives single notifications pain.998_ASInitiationStatus (AS transfer order settlement notification)
Group Status=ASCD.
Credited/Debited Settlement Banks receive a camt.054 BankToCustomerDebitCreditNotification message (local instrument ASTI) when opting for them |
| Test evidence | AS: copy of the pain.998 ASInitiationStatus |
