

<b>General Information (Origin of Request)</b>		
<input type="checkbox"/> User Requirements (URD) <input checked="" type="checkbox"/> Other User Functional or Technical Documentation (SYS)		
<b>Request raised by:</b> Eurosystem	<b>Institute:</b> Eurosystem	<b>Date raised:</b> 21/03/2013
<b>Request title:</b> Addition of the Category attribute to the static data entities Securities, Party and Securities Account		<b>Request ref. no:</b> T2S 0397 SYS
<b>Request type:</b> Common		<b>Urgency:</b> Normal
<b>1. Legal/business importance parameter:</b> Medium	<b>2. Market implementation efforts parameter:</b> Low	
<b>3. Operational/Technical risk parameter:</b> Medium	<b>4. Financial impact parameter:</b>	
<b>Requestor Category:</b> Eurosystem	<b>Status:</b> Withdrawn by initiator	

**Reason for change and expected benefits/business motivation:**

The three new attributes would allow CSDs and CBs to have a T2S standard category centrally in T2S. Moreover, it would support the CSDs' and CBs' configuration of the T2S rule-based models (Restriction, message subscription and Conditional Securities Delivery). The values of the new attributes should be standard in T2S. It should be determined if standard rules could be implemented on the new attributes in T2S.

**Description of requested change:**

Addition of a new attribute to the following static data entities

Static data entity	New Attribute	Values
Securities	Securities category	Harmonised values (to be defined)
Party	Party category	Harmonised values (to be defined)
Securities Account	Securities Account category	Harmonised values (to be defined)

**High level description of Impact:**

**Outcome/Decisions:**

\* CRG meeting of 25 March 2013: The CRG agreed that this CR might help reducing the number of MSAs and would have to be further studied in the future in order to be used as long-term mitigation measure.

\* CRG meeting of 8-9 February 2016: The CRG decided to put the Change Request on hold for T2S Release 2.0 potentially.

\* CRG meeting of 6 September 2016: The initiator of the Change Request has withdrawn Change Request T2S-0397-SYS since (i) No CSD seems to have issues with the maximum number of 10 MSAs (ii) The rule-based models are in place and it is unlikely that CSDs would change them now, even if other standard attributes were available (iii) XMAP has not identified common MSAs across CSDs which could easily be transformed into standard attributes.
