

T2S CHANGE REQUEST FORM		
General Information (Origin of Request) ☐ User Requirements (URD) or GUI Business Functionality Document (BFD) ☒ Other User Functional or Technical Documentation (SYS)		
Request raised by: 4CB	Institute: 4CB	Date raised: 18/12/2024
Request title: Multiplex Editorial Change Request (for R2025.JUN)		Request ref. no: T2S 0847 SYS
Request type: Common	Classification: Maintenance	Urgency: Normal
1. Legal/business importance parameter¹: Medium		2. Market implementation efforts parameter: n/a
3. Operational/Technical risk parameter: n/a		4. Financial impact parameter: No cost impact
Requestor Category: 4CB		Status: Implemented

Description of requested change:

Editorial changes regarding on UDFS and UHB (for R2025.JUN)

Reason for change and expected benefits/business motivation:

The editorial changes relate to either the UDFS or UHB for R2025.JUN. Their incorporation into the UDFS or UHB for R2024.NOV is required for clarifying the documentation underlying the software.

Please note that the changes referring to UDFS for R2025.JUN will also be reflected, when relevant, into the message documentation published in MyStandards.

2 EUROSYSTEM UPDATE [INC-422446]: page 438 (GFS-chapter 3.5.6.2 Description of the module), page 440 (GFS chapter 3.5.6.3 Description of the functions of the module), page 396 (UDFS chapter 1.6.1.8.4. Provision check process), page 671 (UDFS chapter 1.6.2.4.3 Corporate actions / monetary policy operations cash process); CR-679 SLTO not executed

The standing liquidity transfer order set up for the DCA “DCA-TEST-CR679” with a triggering event CARL and a dedicated amount configuration in T2S is not executed after a CORP-labelled PFOD SI moving cash to the account. The amount transferred is lower than the threshold for this SLTO, but it should have attempted an immediate liquidity transfer which would have been rejected with the proper BR (SXAA020). It seems to happen because the PFOD occurs the first day of the SLTO active period as it has been working in the same configuration apart from this parameter.

GFS-chapter 3.5.6.2 Description of the module, page 438

3.5.6.2 Description of the module

Management of the Rebalancing Liquidity following Corporate Action or Monetary Policy Operation

A collection can contain one or several Settlement Transactions related to corporate actions **{T2S.06.111}** **{T2S.06.112}** or central bank monetary policy operations (in repo countries) **{T2S.06.630}**. They are identified by their ISO transaction code.

In case of monetary policy operations, the rebalancing of the credited cash to the RTGS is mandatory.

In case of corporate action, the rebalancing of the credited cash to the RTGS is performed if the credited party has subscribed to the Corporate Action Rebalancing Liquidity (CARL) and if the amount to be credited is equal to or above the minimum threshold configured on the standing order for rebalancing.

In both cases, the module generates an additional Settlement Transaction in order to automatically transfer the received cash into the relevant RTGS Dedicated transit account **{T2S.06.117}**. This Settlement Trans-action is

added to the collection to be settled together with the Settlement Transactions related to corporate actions {T2S.06.118} or monetary policy operations {T2S.06.630}.

GFS-chapter 3.5.6.3 Description of the functions of the module, page 440

3.5.6.3 Description of the functions of the module

2 – Common Limit and Provision Checking

[...]

Preparation of Corporate Action and Monetary Policy Rebalancing Liquidity transfers

[...]

When receiving the collection and before performing any other treatment, the function prepares the Settlement Transactions corresponding to immediate Liquidity Transfers related to corporate action or monetary policy settlement transactions. These prepared Settlement Transactions are to be taken into account by the provisioning net flow preparation.

More specifically, the function:

- I Selects the Settlement Transactions which have an ISO transaction code related to a corporate action or monetary policy operation;
- I For each Settlement Transaction related to a corporate action, checks in the static data if an option of automatic transfer to RTGS account is defined for the credited T2S Dedicated cash account and if the amount to settle on the settlement transaction is equal to or above the optional minimum threshold configured for the rebalancing standing order;
- I In case of a Settlement Transaction related to monetary policy operation, or in case of a corporate action with the rebalancing option, prepares the associated immediate Liquidity Transfer settlement transaction, moving the received cash into the RTGS Dedicated transit account corresponding to the currency. No immediate Liquidity Transfer for rebalancing is generated in case of a corporate action with the rebalancing option if the amount to be settled move is below the optional minimum threshold.

UDFS-chapter 1.6.1.8.4 Provision check process, page 396-397

1.6.1.8.4. Provision check process

Provision check preparation

Generation of Liquidity Transfer for cash rebalancing

T2S rebalances automatically to the RTGS, the cash credited by Settlement Instruction related to corporate actions or related to monetary policy operations according to the conditions below.

On Settlement Instruction related to a corporate action (See section Proceeds resulting from Corporate Actions or monetary policy operations [□ 581]), T2S generates immediate Liquidity Transfer if all the following rules are

fulfilled:

Addition to previously specified table according to below:

Conditions	Rules
Settlement Instruction related to a corporate action	The ISO transaction code of the Settlement Instructions is related to corporate action on stock or on flow.
Existence of a predefined standing order for rebalancing	A valid predefined standing order is set by the owner of the T2S dedicated cash account to rebalance cash received from a corporate action.
<u>Existence of a minimum threshold for a predefined standing order for rebalancing</u>	<u>The amount of the liquidity transfer is equal to or above the minimum threshold.</u>

If the amount to be settled on the Settlement Instruction related to the corporate action is below the optional minimum threshold configured on the standing order for rebalancing, T2S does not generate any unsettled immediate Liquidity Transfer.

UDFS-chapter 1.6.2.4.3 Corporate actions / monetary policy operations cash process, page 671

Creation of Liquidity Transfer

The existence of Corporate Actions is checked in T2S at any time of the Settlement Day, during Night-time or Real-time Settlement periods. For details in respect of this checking process, please refer to section Provision check process [□ 306].

For any Settlement Instruction related to Corporate Actions (leading to a credit posting on the Dedicated Cash Account), T2S checks whether a Standing Liquidity Transfer Order related to Corporate Action was defined for the T2S Dedicated Cash Account to be credited. If such an Order exists and if the amount to be credited is equal to or above the optional minimum threshold configured on the standing order for rebalancing, T2S automatically generates a Liquidity Transfer which immediately and always transfers the respective cash proceeds from the T2S Dedicated Cash Account to the linked RTGS account (in a way avoiding that the cash may be used for any other purpose in the meantime). Within T2S this automatic Liquidity Transfer generation is triggered by the business event "CARL".

3 EUROSYSYSTEM UPDATE [INC-415701]: page 276 (UDFS-chapter 1.6.1.5.3 Cancellation process); UTEST - Discrepancy in cancellation response message statuses (CANI/ CANT)

Based on ticket analysis, instructions should have received CANI instead of CANT from T2S.

D0534081 -->Instruction was cancelled by user, participant should have received CANI but T2S has sent CANT which is not expected.

D0534079 / 2405162847361932 -->Instruction was cancelled by user, participant should have received CANI but T2S has sent CANT which is not expected.

UDFS-chapter 1.6.1.5.3 Cancellation process, page 276

Instruction Cancellation process

(...)

If the referenced Settlement Instruction is matched, T2S requires bilateral cancellation and the cancellation is only possible if both Counterparties send their Cancellation Instructions to cancel each leg separately or if the Cancellation Instruction is sent with the information of both legs by an authorised T2S Party *.

[footnote *]

In case the CSD and the Party send their respective cancellation instructions for the same leg, and both remain pending in the system awaiting for their counterparty in order to match and be executed, T2S matching process prioritises for the matching the CSD cancellation instruction over the party cancellation instruction.

Editorial updates

UDFS-chapter 1.4.4.5.4 End of day processes, page 214

TABLE 1 - PROCESSES DURING THE END OF DAY PERIOD

T2S processes	Description of the process
Stop settlement engine	Stop any settlement of Settlement Instructions, Settlement Restrictions and liquidity transfers and process securities account consistency check.
Recycling and purging	Recycling and purging where T2S selects and cancels all accepted but unsettled or partially settled Settlement Instructions/Settlement Restrictions that have passed their last recycling day. It cancels unmatched instructions which remain pending for more than 20 days as defined by ECSDA standard and T2S recycles any matched instructions <u>which remain unsettled or partially settled for an unlimited period more than 60 days after ISD or last status change.</u> Subsequently T2S informs the T2S Actors about the cancellation of such instructions.
EOD Reporting	T2S generates all the end of day reports (e.g. on holdings, instructions) and account statements on T2S DCA, as per the report configuration setup and makes the generated reports available to T2S Actors. The provision of the generated reports is not a pre-requisite to close the T2S business day.
Close of T2S business day

Editorial updates

DWH UHB-chapter 6.2.1 SST01 – Finalised matched instructions, page 416

Context of Usage

This report shows volumes, ~~values~~ amounts and quantities for all finalised settlement instructions (SIs), at CSD or CSD participant or securities account level, during a selected period of time. The settlement instructions are filtered according the settlement types of the securities and the currency of the settlements that the user selects.

The report delivers the volume of matched settlement instructions finalised during the selected period whether settled, partially settled or cancelled, the total of ~~original instructed~~ quantity whether settled, partially settled or cancelled, the settled quantity, the matched ~~value~~ amount and the settled ~~value-~~ amount per ISIN.

The results are displayed aggregated per transaction type code, transaction sub-category and securities movement type.

10 EUROSYSTEM UPDATE [Internal review]: page 419 ff. (DWH UHB-chapter 6.2.2 SST02 – Detailed finalised matched instructions); Editorial update

Editorial updates

DWH UHB-chapter 6.2.2 SST02 – Detailed finalised matched instructions, page 419

Context of Usage

This report shows detailed information on volume and quantities for all finalised settlement instructions (SIs), at CSD or CSD participant or securities account level, during a selected period of time. The settlement instructions are filtered according the settlement types of the securities that the user selects.

The volume, the instructed quantities and the settled quantities of settlement instructions are displayed per ISIN per settlement status.

The results are displayed aggregated per transaction type code, transaction sub-category and securities movement type and as totals.

This report can be used by CSD users.

Volume	The aggregated number of securities postings are displayed for each balance type, origin and debit/credit/total within each of the above time slots.
Quantity	The aggregated quantity of securities postings are displayed for each balance type, origin and debit/credit/total within each of the above time slots.
Total (per balance type): Total earmarking Total blocking Total COSD blocking Total deliverable Total earmarking for autocollateralisation Total reservation	The sums of 'Volume' and 'Quantity' across 'Debit' and 'Credit' per column, over all origins within balance type.
Total (final)	The sums of 'Volume' and 'Quantity' across 'Debit' and 'Credit' per column, over all balance types.

12 EUROSYSTEM UPDATE [Internal review]: page 435 ff. (DWH UHB-chapter 6.3.1 INX01 – Individual settlement detailed report); Editorial update

Editorial updates

DWH UHB-chapter 6.3.1 INX01 – Individual settlement detailed report, page 435

Context of Usage

This report shows all finalised business settlement instructions (SI) corresponding to the selected T2S references.

The attributes shown in the output provide business details related to each of the selected settlement instructions and are represented by a button to select the Delivery or Receiver tab for the corresponding perspective. This simplifies the comparison between the instructions. ~~displayed in a manner which allows easy comparison between these instructions.~~

Field Description

INX02 – Multi-criteria search of a set of settlement instructions – Details Screen	
Reference information	
T2S actor instruction reference	Shows the reference provided by the T2S actor
Status information	
Match status	Shows if the settlement instruction is matched with a counterpart settlement instruction. Possible values: ■ NMAT (unmatched) ■ MACH (matched)
[...]	[...]
Timeline information	
Entry date	Shows the date when the settlement instruction entered the T2S system. Display format is: YYYY-MM-DD
Intended settlement date	Shows the intended settlement date. Display format is: YYYY-MM-DD
Actual settlement date	Shows the actual settlement date, if applicable. Display format is: YYYY-MM-DD
Cancellation date	Shows the date when the settlement instruction was cancelled, if applicable. Display format is: YYYY-MM-DD
Categorisation information	
[...]	[...]
Securities information	
ISIN	Shows the ISIN.
[...]	[...]
Original instructed settlement quantity	Shows the original settlement quantity.
[...]	[...]
Securities party information	
[...]	[...]
Cash information	
(Please note, that this part will be empty for Settlement Instructions with transaction code = FOP)	

Currency code	Shows the currency code.
[...]	[...]
Matched <u>settlement</u> amount	Shows the matched amount as per the matching process.
[...]	[...]
Cancelled settlement amount	Shows the cancelled amount if the SI is not completely settled.
<u>Cash party information</u>	
<u>NCB BIC</u>	<u>Shows the BIC of the national central bank.</u>
<u>Payment bank BIC</u>	<u>Shows the BIC of the payment bank.</u>
Process information	
Priority	Shows the priority. Possible values: 0001 (reserved) 0002 (top) 0003 (high) 0004 (normal)
[...]	[...]
Trade information	
Trade date	Shows the trade date of the settlement instruction. Display format is: YYYY-MM-DD
LCMM information	
LCMM approval status	Shows the LCMM approval status. Possible values: - APPR (approved (default value)) - AWAP (awaiting approval) - REJT (rejected) - RVKD (revoked)

Figure xxx - INX04 prompt screen 2 (CSD User login) - Account number

Update of figure 398:

The screenshot shows a web application interface for a multi-criteria search. The title bar at the top includes 'Edit', a dropdown menu, and navigation icons. The main heading is 'INX04 – Multi-criteria search of a set of settlement restrictions – Prompt'.

Keywords: A search box with the placeholder 'Input keywords here' and a magnifying glass icon. Below it is a 'Select all' checkbox and a 'No Results' message. To the right of the search box is a large empty box with the text 'Please search and select the cash party BIC' and 'Select all Deselect all' at the bottom.

Cash party BIC: A label on the left side of the screen.

Settlement status: A section with a dropdown menu showing 'Starts with any of these keywords'. Below it is a checked checkbox for 'Case Insensitive' and a list of settlement statuses: 'PSET - Partially settled', 'SETT - Settled', and 'USET - Unsettled'.

Cancellation status: A section with a dropdown menu showing 'CANC - Cancelled' and 'NCAN - Not cancelled'.

Range criteria: A section with two columns, 'From' and 'To'. Each column has two date pickers. The 'From' column has 'Entry date' and 'Intended settlement date', both set to 'Nov 15, 2024'. The 'To' column has 'Nov 15, 2024' for both dates.

Navigation: At the bottom, there are four buttons: 'Cancel', '< Back', 'Next >', and 'Finish'.

New figure:

The screenshot displays the 'INX07 – Multi-criteria search of a set of amendment instructions – Prompt' window. It features a search bar with the placeholder 'Input keywords here' and a magnifying glass icon. Below the search bar is a 'Select all' checkbox and a 'No Results' message. To the right of the search bar is a large empty box labeled 'Please search and select the securities account number'. Below the search bar is a dropdown menu labeled 'Starts with any of these keywords'. The main search area contains several filter sections: 'Securities account number:', 'Referenced instruction type:' (with options STIN and STRN), 'Partial settlement indicator:' (with options NPAR, PART, PARC, and PARQ), 'Priority:' (with options 0001, 0003, and 0004), 'Approval status:' (with options APPR, AWAP, REJT, and RVKD), and 'Execution status:' (with options EXCD and NEXD). At the bottom, there is a 'Range criteria' section with 'From' and 'To' date pickers, both set to 'Nov 15, 2024'. The interface also includes a 'Select all' and 'Deselect all' link at the bottom right of the search results area.

Editorial updates

DWH UHB-chapter 6.7.1 RAL01 –Detailed realignment and other technical instructions, page 558

Context of Usage

This report shows detailed information on volume and quantities for all realignment and other technical settlement instructions (SIs) at CSD, CSDP/ECSD or securities account level, during a selected period of time. The settlement instructions are filtered according the settlement types of the securities that the user selects.

The volumes and quantities (original and the settled) are aggregated per ISIN per transaction type code, transaction category and transaction sub-category; and displayed by securities movement type and settlement status.

[...]

Field Description

Figure 12 - RAL01 output screen, tab 2- quantity

[...]

Field Description

RAL01 – Detailed realignment and other technical instructions – OUTPUT SCREEN Tab 1 - volume	
Transaction type code	Shows the settlement transaction type code set during the selected period duration of time from the possible values: - DVP (delivery versus payment) - DWP (delivery with payment) - FOP (free of payment) - PFOD (payment free of delivery)
Settlement t Transaction category	Shows the category of the settlement transaction from the possible values: - REAL (realignment) - COTF (conditional technical FOP)
Settlement t Transaction sub-category	Shows the subcategory of the settlement transaction from the possible values: - REAL (realignment) - PLED (pledge) - REPO (repurchase order) - COBS (CoSD blocking position setup) - STND (standard)
DELI <u>DELI</u>	
[...]	[...]
<u>Volume</u> $\mp$ total	Sum of 'Volume totally settled', 'Volume partially settled / partially cancelled' and 'Volume totally cancelled' with security movement type DELI, per transaction type / transaction category and sub-category.
RECE <u>RECE</u>	
[...]	[...]
<u>Volume</u> $\mp$ total	Sum of 'Volume totally settled', 'Volume partially settled / partially cancelled' and 'Volume totally cancelled' with security movement type RECE, per transaction type / transaction category and sub-category.
Total	
[...]	[...]

<u>Volume T total</u>	Sum of the 'Total' over all DELI and RECE security movement types, per transaction type/ transaction category and sub-category.
Total	
<u>Total</u>	Sum of the volumes over all transaction type codes, for each column of the report as above.

RAL01 – Detailed realignment and other technical instructions – OUTPUT SCREEN Tab 2 - quantity	
Transaction type code	Shows the settlement transaction type code set during the selected period duration of time from the possible values: - DVP (delivery versus payment) - DWP (delivery with payment) - FOP (free of payment) - PFOD (payment free of delivery)
Settlement Transaction category	Shows the category of the settlement transaction from the possible values: - REAL (realignment) - COTF (conditional technical FOP)
Settlement Transaction sub-category	Shows the subcategory of the settlement transaction from the possible values: - REAL (realignment) - PLED (pledge) - REPO (repurchase order) - COBS (CoSD blocking position setup) - STND (standard)
DELI	
[...]	[...]
<u>Quantity total</u>	<u>Sum of 'Quantity totally settled', 'Quantity partially settled / partially cancelled' and 'Quantity totally cancelled' with security movement type DELI, per transaction type / transaction category and sub-category.</u>
RECE	
[...]	[...]
<u>Quantity total</u>	<u>Sum of 'Quantity totally settled', 'Quantity partially settled / partially cancelled' and 'Quantity totally cancelled' with security movement type RECE, per transaction type / transaction category and sub-category.</u>

Total	
Original Instructed quantity	Sum of 'Original quantity' for 'DELI' and 'RECE' per transaction type / transaction category and sub-category.
Quantity settled (totally settled + partially settled)	Sum of 'Quantity totally settled' plus 'Quantity Partially settled' for 'DELI' and 'RECE' per transaction type / transaction category and sub-category.
Total	
Total	Sum of the quantities over all transaction type codes, for each column of the report as above.

RAL01 – Detailed realignment and other technical instructions – Prompt screen	
Date From	You can select the date by clicking on the calendar. This field is mandatory.
Date To	You can select the end date of the period, for which the report should contain the data by clicking on the calendar. For valid report results, the current day cannot be selected. This field is mandatory.
Settlement type	This selection specifies the quantity type of the settlement for the security, stated in the instruction. Possible values: ☐ FAMT - Nominal ☐ UNIT - Units This field is mandatory.
