Extract: Sitemaps
Reader's Guide

The sitemap annex is structured along the first and the second GUI menu level. It provides you with a formalised illustration of all screens (pictured as rectangles) and their related buttons (pictured as arrows). The illustration helps you to get an overview of all GUI screens and their interrelation, indicated by the arrows.

In general, each sitemap has the same layout. The header of the sitemap always indicates the GUI menu item pictured by the sitemap. The first 3 lines represent the 3 main menu levels.

Illustration 1: Sitemap menu levels – GUI path

In lines 4 to 6, the single GUI screens are pictured following their business logic, i.e. starting with search/list screens in line 4, details or enter screens in line 5 and finishing with revisions/audit trail – list screens in line 6.

Illustration 2: Sitemap menu levels - screens

Within these lines, regular rectangles represent a menu item, rounded rectangles represent a screen.

Illustration 3: Menu item and sitemap screen illustration
**Interrelation between screens**

Arrows between the rectangles represent an interrelation, while the button that has to be clicked on to jump from one screen to another is written across the corresponding arrow.

**Illustration 4**: Screen interrelation

**Menu item and screen rectangles**

The screen rectangles follow the same colour-coding as the GUI (see menu structure). The classification found in the top left corner of each rectangle provides the following detailed information:

- Capital M for menu followed by max. 3 digits indicating the main menu item (1 for securities, 2 for cash, 3 for services, 4 for static data, 5 for monitoring) and following menu levels.
- Screen classification (C/L for search/list screen, C for search screen, L for list screen, D for details screen, E for enter screen).

**Illustration 5**: Sitemap screen with classification and with button

**Screens with a different colour**

On some sitemaps you will also find screens illustrated in a different colour than it is foreseen for the respective T2S menu. These particular screens represent an alternative navigation to the same respective screen. These specific screens appear on the same menu level than the regular screens.
Because of the size of the sitemap it has been split into several parts. You can recognise the use of several sitemap parts by an arrow leading to the next sitemap part.

The static data sitemap for example is divided into 14 different sitemaps because of the wealth of information. Therefore it is recommended to read the sitemap from the top to the bottom and then from the left hand-side to the right hand-side.
