See also explanatory notes at the end of the press release.

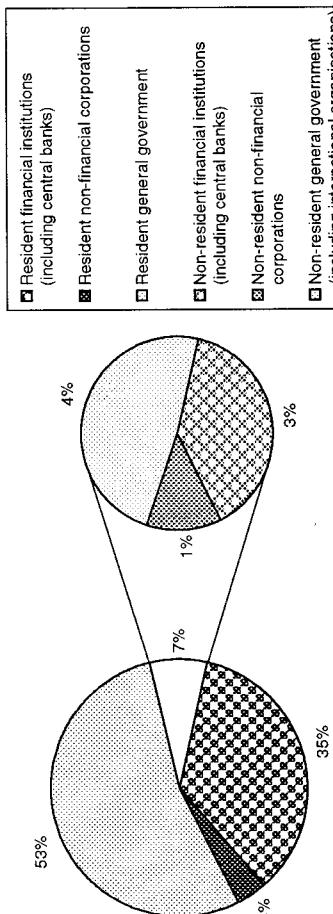

<sup>1</sup> On-balance sheet financial claims, also known as lending to the "immediate borrower." <sup>2</sup> Owing to the omission of the unallocated item in this and the following tables the percentage shares do not total 100. <sup>3</sup> The data show the effect of a reallocation of claims from the country of the immediate counterparty to that of the ultimate risk (i.e. a third party guarantor or the head office of a legally dependent branch) as reported by 14 of 20 countries. <sup>4</sup> Prior to 1999 H1, BIS reporting banks did not report claims on other BIS reporting countries. <sup>5</sup> The large decline in claims on a contractual basis in 1999 H1 mainly reflects the change from unconsolidated to partially consolidated reporting by German banks. <sup>6</sup> Including eastern Europe.

<sup>1</sup> All figures are adjusted for double-counting. Notional amounts outstanding have been adjusted by halving positions vis-à-vis other reporting dealers. Gross market values have been calculated as the sum of the total gross positive market value of contracts and the absolute value of the gross negative market value of contracts with non-reporting counterparties. <sup>2</sup> Single-currency contracts only. <sup>3</sup> Adjustments for double-counting estimated. <sup>4</sup> For end-June 1998: positions reported by non-regular reporting institutions in the context of the triennial Central Bank Survey of Foreign Exchange and Derivatives Market Activity at end-June 1998; for subsequent periods: estimated positions of non-regular reporting institutions. <sup>5</sup> Gross market values after taking into account legally enforceable bilateral netting agreements.
