Labour productivity growth for in the main regions

annual percentage changes, three-year moving averages

Source: Conference Board. Note: Labour productivity is measured as output per employee.
Projected GDP per capita

US Dollars (2010), PPP, thousands

Source: OECD and ECB staff calculations.
Note: assumes constant output per worker and actual unemployment rate equal to the OECD’s current estimate for the non-accelerating inflation rate of unemployment (NAIRU).
Labour productivity growth of global frontier firms and non-frontier firms

Index 2002 = 1

Manufacturing

Services

Sources: OECD (2014) and CompNet sample based on firms with 20 employees or more. Notes: OECD global frontier firms are defined as the 100 most productive firms within an industry (defined at the 2 digit level according to NACE rev.2) and year. OECD non-frontier firms refer to the (weighted) average productivity growth of non-frontier firms in each of the 2-digit manufacturing industries, considering all OECD countries. Euro area countries covered are: Austria, Belgium, Finland, France, Germany, Italy, Portugal and Spain.
