

29 July 2014

PRESS RELEASE

EURO AREA ECONOMIC AND FINANCIAL DEVELOPMENTS BY INSTITUTIONAL SECTOR — FIRST QUARTER 2014

- **Household financing** and **financial investment** grew at broadly unchanged annual rates of 0.3% (fourth quarter 2013: 0.2%) and 1.5% (fourth quarter: 1.6%) respectively.
- Non-financial corporations' net entrepreneurial income (broadly equivalent to current profits) increased at a lower annual rate (0.2% after 1.4%), while their gross fixed capital formation increased at an annual rate of 3.9% after 1.5% in the previous quarter.

In the first quarter of 2014 the annual growth rate¹ of <u>household</u> gross disposable income decreased to 0.8% (previous quarter: 1.7%, see Table 2). The annual growth rate of household consumption expenditure was broadly unchanged at 1.2% in the first quarter (after 1.1%). Reflecting these developments, the annual growth rate of household gross saving decreased to -1.8% in the first quarter, from 5.6% in the previous quarter. The household gross saving rate² was 13.0% in the first quarter of 2014, compared with 13.1% in the first quarter of 2013. The annual growth rate of household financing was broadly unchanged at 0.3% (fourth quarter: 0.2%), and that of financial investment was broadly unchanged at 1.5%(fourth quarter: 1.6%). Household net worth³ increased at a higher annual rate of 1.9% (fourth quarter: 0.6%).

Net entrepreneurial income of <u>non-financial corporations</u> increased at a lower annual rate of 0.2% in the first quarter of 2014, after 1.4% in the previous quarter (see Table 3). Gross fixed capital formation of non-financial corporations increased at an annual rate of 3.9% after 1.5% in the previous quarter. The annual growth rates of **financing** decreased to 0.5% (fourth quarter: 0.8%) and that of **financial investment** decreased to 1.0% (fourth quarter: 1.4%).

¹ The euro area accounts are expressed in current prices and are not seasonally adjusted. The growth rates are presented as year-on-year percentage changes (see the notes).

² The household saving rate is based on four-quarter cumulated sums of both saving and gross disposable income (adjusted for the change in the net equity of households in pension fund reserves).

³ Households' net worth consists of net financial assets and non-financial assets. Non-financial assets consist mainly of housing wealth (residential structures and land). They also include non-financial assets of unincorporated enterprises classified within the household sector.

Debt of households and non-financial corporations as a percentage of GDP stood at 63.9% (first quarter 2013: 65.2) and 104.4%, (first quarter 2013: 106.5) respectively (see Tables 2 and 3).⁴

Total euro area economy

Euro area net disposable income increased at an annual rate of 1.7% in the first quarter of 2014, compared with 1.4% in the fourth quarter of 2013(see Chart 1 and Table 1). Euro area gross fixed capital formation grew an annual rate of 2.3%, after decreasing in the previous quarter (-0.2%, see Chart 2). Gross capital formation, which includes in addition inventories, grew an annual rate of 1.8%, after decreasing in the previous quarter (-0.3%, see Chart 3). The increased gross capital formation was broadly matched by increased euro area savings, resulting in a continued growth of net lending by the euro area to the rest of the world (corresponding to an increase in the current and capital account surplus).

Households

The annual growth rate of household **gross disposable income** decreased to 0.8% in the first quarter of 2014 (previous quarter: 1.7%, see Table 2). This deceleration resulted mainly from decreasing net property income and net social benefits, while compensation of employees continued to grow (see also Chart 4).

The annual growth rate of household **consumption expenditure** was broadly unchanged at 1.2% in the first quarter (after 1.1%), while that of household gross saving decreased to - 1.8% from 5.6%. The household **gross saving rate** was 13.0% in the first quarter of 2014, compared to 13.1% in the first quarter of 2013. The annual growth rate of gross fixed capital formation of households was 0.2% in the first quarter (previous quarter: -1.2%).

The annual growth rate of household **gross non-financial investment** was 0.2% in the first quarter of 2014, compared with -0.8% in the previous quarter (see Chart 5). This increase, together with the decrease in gross savings, led to a slight decrease of household **net lending**. The annual growth rate of financing of households was broadly unchanged at 0.3% in the first quarter (fourth quarter 2013: 0.2%), and loan financing decreased at a lower rate (-0.1%, after -0.3% in the previous quarter, see Table 2).

⁴ The sum of the debt of the household sector and of the non-financial corporation sector (also referred to as "Private debt"), as a percentage of GDP is one of the headline indicators of the macroeconomic imbalance procedure (MIP). For non-financial corporations the definition of debt used by the MIP differs from the definition applied here as the MIP indicator is based on annual, consolidated (excluding debt financing within the NFC sector) data and pension fund reserve liabilities are excluded. In both cases, trade credits are not included.

The growth of **household financial investment** was broadly unchanged at 1.5% (fourth quarter 2013: 1.6%). Among the components, the annual growth rate of holdings of currency and deposits decreased to 2.3% (previous quarter: 2.6%), while the annual growth rate of investment in debt securities became less negative (-9.3%, from -10.4% in the previous quarter). The annual growth rate of investment in shares and other equity decreased to 1.7% (previous quarter: 2.7%) and that of additions to life insurance and pension fund reserves increased to 3.1% (previous quarter: 2.9%).

Developments in **household balance sheets** reflect the acquisition of financial and non-financial assets, the incurrence of liabilities as well as valuation changes for financial and non-financial assets (see Chart 6 and Table 2). **Household net worth** increased at an annual rate of 1.9%, which is higher than in the previous quarter (0.6%), as financial and non-financial investments exceeded the incurrence of debt, and valuation gains on financial assets exceeded valuation losses on non-financial assets. The decline in **housing wealth** decelerated (annual rate of -0.8%, after -2.3%), while financial assets grew at a higher rate, partly due to the valuation effects. The annual growth rate of the market value of household holdings of shares and other equity increased to 13.7% (previous quarter: 12.6%). The **household debt ratio**, defined here as the outstanding amount of loans as percentage of household gross disposable income, decreased to 96.7% in the first quarter of 2014, from 97.9% in the first quarter of 2013 (as a percentage of GDP, debt stood at 63.9%, see Table 2).

Non-financial corporations

Net entrepreneurial income⁵ of non-financial corporations increased at a lower annual rate (0.2%) than in the previous quarter (1.4%) (see Table 3). A deceleration is also seen in net value added which increased at an annual rate of 1.5% (after 1.9%). The annual growth rate of **gross fixed capital formation** increased at an annual rate of 3.9% after 1.5% in the previous quarter. The annual growth rate of **total gross non-financial investment**, which includes inventories, decreased to 0.5% from 2.1% (see Chart 8). **Net lending** of non-financial corporations as a percentage of gross value added increased to 1.1% in the first quarter of 2014, from 0.5% in the first quarter of 2013 (see Table 3).

The annual growth rate of financing of non-financial corporations decreased to 0.5% in the first quarter (0.8% previously). The annual growth rate of non-financial corporations' loan financing was broadly unchanged at -1.1% (fourth quarter: -1.0). The growth rate of the issuance of debt securities decreased to 7.8% (previous quarter: 8.0%). The **non-financial corporation debt ratio**, defined here as the outstanding amount of loans, debt securities

_

⁵ Net entrepreneurial income is broadly equivalent to current profits in business accounting (after the receipt and payment of interest and including the profits of foreign subsidiaries, but before the payment of income taxes and dividends).

and pension fund reserve liabilities as a percentage of GDP, decreased to 104.4% in the first quarter of 2014, from 106.5% in the first quarter of 2013. The annual growth rate of equity financing, via the issuance of quoted and unquoted shares and other equity, decreased to 1.4% (1.6% previously).

Financial investment of non-financial corporations increased at an annual rate of 1.0% in the first quarter of 2014, compared to 1.4% in the previous quarter. The annual growth rate of investments in currency and deposits decreased to 5.1% from 6.0%, and that of debt securities became less negative (-3.4% after -12.3% previously). The annual growth rate of loans granted was unchanged at 0.1%, and that of investment in shares and other equity decreased to 0.3% (1.0% previously).

Insurance corporations and pension funds

The annual growth rate of **insurance technical reserves**, the major financing instrument of insurance corporations and pension funds, increased to 3.3% in the first quarter of 2014 (previous quarter: 3.0%). The annual growth rate of the **financial investment** of insurance corporations and pension funds was unchanged at 3.4%. The growth rate of investment in debt securities decreased to 4.1% (from 4.6%), while the growth rate of investment in shares and other equity was broadly unchanged at 4.3% (after 4.2%).

Change-over to new statistical standard (ESA 2010)

From autumn 2014 onwards, EU National Accounts data, which includes financial accounts and non-financial accounts by institutional sector, will be published based on a new methodology (ESA 2010) which is in line with the new international statistical standards and replaces the ESA 1995.

See http://www.ecb.europa.eu/stats/acc/ESA2010/html/index.en.html for further detail.

For media enquiries, please contact Elodie Nowodazkii, tel.: +49 69 1344 7390.

Notes

• The annual growth rate of non-financial transactions and of outstanding financial assets and liabilities (stocks) is calculated as the percentage change between the value of the transaction or outstanding amount for a given quarter and that value recorded four quarters earlier. If x_t is the value of a non-financial transaction or end-of-quarter stock, its annual percentage change $g(x_t)$ is calculated as:

$$g(x_t) = \frac{(x_t - x_{t-4})}{x_{t-4}} * 100$$

• The annual growth rate used to analyse financial transactions refers to the total value of transactions during the year in relation to the outstanding stock a year before. These growth rates for financial transactions exclude the effect on the outstanding stock of revaluations, reclassifications and other changes that do not arise from transactions. If f_t represents the value of transactions in a particular financial instrument and F_t represents the value of the corresponding stock outstanding at the end of quarter t, then the annual growth rate $g(f_t)$ is calculated as the sum of the transactions during the year divided by the outstanding stock a year ago:

$$g(f_t) = \left(\sum_{i=0}^{3} f_{t-i} / F_{t-4}\right) * 100$$

- The euro area accounts encompass integrated non-financial and financial accounts, including financial balance sheets. They are jointly compiled by the ECB and the European Commission (Eurostat), in close cooperation with the national central banks and the national statistical institutes in the EU. ⁶ The European sector accounts (i.e. for the EU and the euro area) follow the methodology of the European System of Accounts 1995 (ESA 95). A detailed set of quarterly data is published in Tables 3.1-3.5, "Euro area accounts", of the statistics section of the ECB's Monthly Bulletin. Net lending for households and non-financial corporations may differ between the non-financial and the financial accounts, reflecting statistical discrepancies.
- The euro area aggregates presented in this press release include data for Latvia for the first time. These aggregates also include Latvia for the reference periods prior to its adoption of the euro.
- This press release incorporates revisions for the fourth quarter of 2013 and for previous quarters.
- A comprehensive set of tables is available at http://sdw.ecb.europa.eu/reports.do?node=1000002343 (ECB). The time series for the euro area accounts can be downloaded from the ECB's Statistical Data Warehouse.
- The publication of the data on euro area economic and financial developments in the second quarter of 2014 based on the new statistical standard ESA 2010 is preliminarily scheduled to take place by the beginning of November 2014. The publication date will be announced on the ECB website in due course.

- 1) Households and non-profit institutions serving households.
- 2) Annual percentage changes are calculated as 100*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction

or stock four quarters earlier.

- 3) Net adjustment for the change in net equity of households in pension fund reserves (receivable payable).
 4) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).
 5) Annual growth rates for financial transactions are calculated as 100*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the end-of-quarter stock value four quarters earlier.
- 6) Loans granted, prepayments of insurance premiums and reserves for outstanding claims and other accounts receivable.
- 7) Financial derivative's net liabilities, pension fund reserves and other accounts payable.
- 8) As a percentage of gross domestic product in the case of debt. 9) Debt is equal to loans received.

- 1) Annual percentage changes are calculated as 100*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction

- 2) As a percentage of net value added in the case of net entrepreneurial income and net saving.

 3) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).

 4) Annual growth rates for financial transactions are calculated as 100*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the end-of-quarter stock value four quarters earlier.

- 5) Other accounts receivable, and prepayments of insurance premiums and reserves for outstanding claims.
 6) Other accounts payable, financial derivative's net liabilities and deposits.
 7) As a percentage of gross domestic product in the case of debt.
 8) Loans received, debt securities issued and pension fund reserves. Trade credits are not included as they are not available for all euro area countries
- (Trade credits are estimated to be about 25% of GDP).

¹⁾ Annual percentage changes are calculated as 100*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction or stock four quarters earlier.

2) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets.

3) Annual growth rates for financial transactions are calculated as 100*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the

end-of-quarter stock value four quarters earlier.

⁴⁾ In line with existing conventions, the financing of the government excludes the net incurrence of liabilities via financial derivatives, shares and other equity, pension fund reserves and other accounts payable, and the financial investment of the government excludes financial derivatives, prepayments of insurance premiums and reserves for outstanding claims and other accounts receivable.

5) Other accounts receivable, financial derivatives and prepayments of insurance premiums and reserves for outstanding claims.

6) Other accounts payable, pension fund reserves, financial derivatives and unquoted shares and other equity.

⁷⁾ General government debt at nominal value and consolidated between sub-sectors of general government.

¹⁾ Annual percentage changes are calculated as 100*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction or stock four quarters earlier.

2) As a percentage of net value added in the case of net entrepreneurial income and net saving.

3) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).

⁴⁾ Annual growth rates for financial transactions are calculated as 100*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the

end-of-quarter stock value four quarters earlier.

5) Monetary gold and SDRs, other accounts receivable, and prepayments of insurance premiums and reserves for outstanding claims.

6) Other accounts payable and financial derivative's net liabilities.

Insurance corporations and pension funds

¹⁾ Annual growth rates for financial transactions are calculated as 100*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the end-of-quarter stock value four quarters earlier.

²⁾ Other accounts receivable, and prepayments of insurance premiums and reserves for outstanding claims.

3) Other accounts payable and financial derivative's net liabilities.

4) Annual percentage changes are calculated as 100*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction or stock four quarters earlier.
