

## PRESS RELEASE

28 July 2016

### **Euro Area Economic and Financial Developments by Institutional** Sector: 1st Quarter 2016

- Euro area saving (net) grew faster than non-financial investments (net) in the first quarter of 2016. Non-financial investment (net) increased for corporations and households. As a result of changes in saving and non-financial investment, euro area net lending to the rest of the world increased further.
- Household debt continued to decrease, both with respect to GDP and disposable income (the respective ratios decreased to 58.9% and to 93.3% in the first quarter of 2016).
- The non-financial corporation debt-to-GDP ratio decreased to 133.1% in the first quarter of 2016. Gross non-financial investment increased at a lower rate (5.2% after 7.2% in the fourth quarter of 2015).

#### Total euro area economy

Euro area net saving, that is the sum of the savings of households, corporations and the government sector after deducting the consumption of fixed capital, increased to 6.4% of euro area net disposable income in the first quarter of 2016, compared with 5.6% in the first quarter of 2015. Euro area net non-financial investment increased to 2.8% (compared to 2.4% of net disposable income in the first quarter of 2015). As a result, euro area net lending to the rest of the world increased compared with the first quarter of 2015 (3.7% after 3.4% of net disposable income). Net lending by households was unchanged (3.3% of euro area net disposable income) while net lending of non-financial corporations increased (2.2% after 2.0%). Net lending by the financial corporations sector decreased and net borrowing by the government sector decreased compared with the first quarter of 2015. (For details, see also Table 1 in the Annex).

#### Households

Household gross disposable income increased at a lower annual rate of 2.4% in the first quarter of 2016 (after 2.6% in the fourth quarter of 2015). The growth rates of compensation of employees, as well as of gross operating surplus and mixed income from the self-employed were broadly unchanged (3.0% and 2.7%), while net social benefits decreased. Household consumption expenditure increased at an unchanged rate (2.1%).

The household gross saving rate in the first quarter of 2016 was 12.5%, the same rate as in the first quarter of 2015. Household gross non-financial investment grew at a higher rate of 4.5% (after 3.8% in the previous quarter).

Loans to households, the main component of household financing increased at a broadly unchanged rate (1.5%).

Household financial investment grew at a lower rate of 2.0% (after 2.2% in the previous quarter). Among the components, currency and deposits grew at a higher rate (3.0% after 2.8%). Life insurance and pension schemes grew at a lower rate (2.8% after 3.0%), as did shares and other equity (2.3% after 3.9%). Households continued to buy investment fund shares as well as unlisted shares and other equity on a net basis. They resumed buying listed shares, after selling listed shares in the previous quarters, on a net basis. In particular, households bought listed shares issued by NFCs and non-residents, while they sold listed shares issued by MFIs. While the decline of debt securities decelerated (-12.2% after -15.1%), redemptions and sales continued to exceed purchases. This development is in particular due to a reduction of household holdings of debt securities issued by MFIs and governments.

Household net worth increased at a lower rate (2.3% after 3.5%), as non-financial investments, financial transactions and valuation gains on non-financial assets were partly offset by holding losses on financial assets. Housing wealth increased at a higher rate (3.9% after 3.0%).

The household debt-to-income ratio decreased to 93.3% in the first quarter of 2016, from 94.3% a year earlier. Table A summarises the main results for households, expressed as a percentage of adjusted disposable income. (For details, see also Tables 2.1 and 2.2 in the Annex).

#### Non-financial corporations

Non-financial corporations' net entrepreneurial income (broadly equivalent to current profits) declined in the first quarter of 2016 after increasing previously (-1.1% after 7.3%) as net operating surplus and net property income both decreased.

Net value added increased at a lower rate (2.9% after 4.2%), as did gross non-financial investment (5.2% after 7.2%) and gross fixed capital formation (4.4% after 5.3%). Financing of non-financial corporations grew at an unchanged rate (2.0%). Loan financing grew at a higher rate (2.0%, after 1.4%) as both loans received from MFIs as well as loans received from non-MFIs accelerated. The issuance of debt securities grew at a lower rate (3.5% after 4.7%), and trade credit financing decelerated as well (2.9% after 3.7%). MFIs and insurance corporations were the main net purchasers of non-financial corporation debt securities. Equity financing grew at a broadly unchanged rate (2.0%).

The debt-to-GDP ratio decreased to 133.1% compared to 135.7% in the first quarter of 2015.

Financial investment grew at an unchanged rate (3.5%). Among the components, loans granted grew at a lower rate (3.6%). Investment in shares and other equity decelerated (2.9% after 3.3%) as well. Table B summarises the main results for non-financial corporations, expressed as a percentage of net value added. (For details, see also Tables 3.1 and 3.2 in the Annex).

<sup>&</sup>lt;sup>1</sup> Loan financing comprises loans granted by all sectors (including loans granted by non-MFI financial institutions) and by creditors that are not residents in the euro area.

**European Central Bank** Directorate General Communications

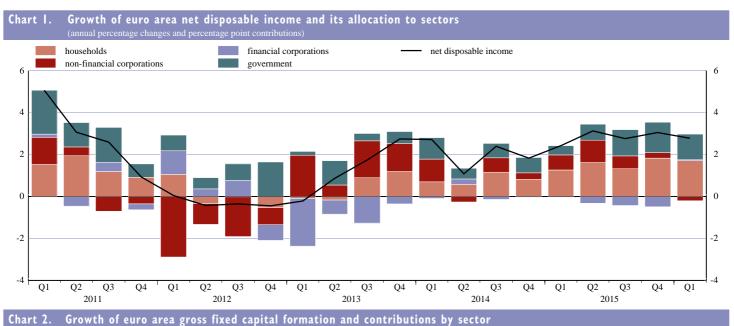

This press release incorporates revisions compared with the press release on "Euro area households and non-financial corporations" of 11 July. Revisions are partly due to some large corporations moving their residency to the euro area in the course of 2015; the statistical treatment of this caused further changes in particular in the non-financial accounts of non-financial corporations. Quarterly financial and non-financial accounts by institutional sector are available for the euro area as well as for EU countries at the ECB's Statistical Data Warehouse (SDW). The annex tables and additional charts, as well as related information for all EU countries, are available under Euro area accounts in the statistics section of the ECB's website, including new tables on 'who-to-whom' relationships. The next release of the new Household Sector Report containing results for the euro area and all euro area countries is scheduled for 8 August 2016. The next quarterly press release, with advanced results for households and non-financial corporations, is scheduled for 11 October 2016 (see also the Statistical Release Calendar on the ECB website: calendar).

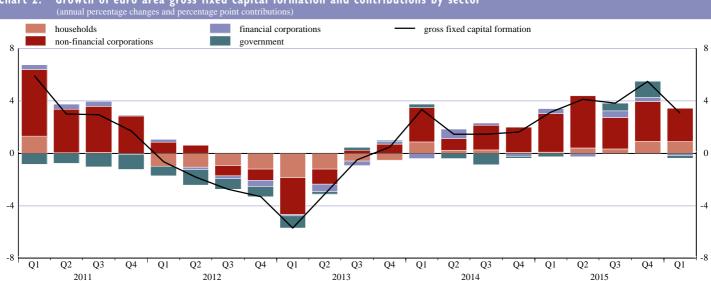

For media queries, please contact Stefan Ruhkamp, tel.: +49 69 1344 5057.

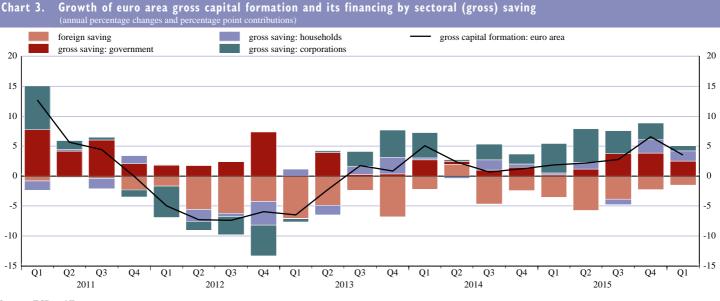

#### Notes:

- The annual growth rate of non-financial transactions and of outstanding assets and liabilities (stocks) is calculated as the percentage change between the value for a given quarter and that value recorded four quarters earlier. The annual growth rates used for financial transactions refer to the total value of transactions during the year in relation to the outstanding stock a year before. Ratios, such as the saving rate, are based on four-quarter cumulated transactions.
- Net entrepreneurial income is broadly equivalent to current profits in business accounting (after the receipt and payment
  of interest and including the profits of foreign subsidiaries, but before the payment of income taxes and dividends).
- The sum of household debt and non-financial corporation debt (also referred to as "private debt") as a percentage of GDP is one of the headline indicators of the macroeconomic imbalance procedure (MIP). For non-financial corporations, the definition of debt used by the MIP differs from the definition applied here, as the MIP indicator is based on annual, consolidated data; moreover, pension fund reserve liabilities and trade credits are excluded. For the MIP data see: <a href="Annual scoreboard for the surveillance of macroeconomic imbalances">Annual scoreboard for the surveillance of macroeconomic imbalances</a>.
- Further methodological information is available at: Euro area accounts.

1) Annual percentage changes are calculated as 100\*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction x in quarter t, and x(t-4) for the transaction four quarters earlier.

2) Households and non-profit institutions serving households.

3) Transfers of goods and services by government units and non-profit institutions serving households (NPISHs) to individual households.

4) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).

7) Financial derivative's net liabilities, pension schemes and other accounts payable.

<sup>1)</sup> Households and non-profit institutions serving households.
2) Calculated as 100\*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction or stock four quarters earlier.

<sup>3)</sup> Net adjustment for the change in net equity of households in pension schemes (receivable - payable).
4) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).
5) Annual growth rates for financial transactions are calculated as 100\*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the end-of-quarter stock value four quarters earlier.

<sup>6)</sup> Loans granted, prepayments of insurance premiums and reserves for outstanding claims and other accounts receivable.

<sup>8)</sup> Debt is equal to loans received and presented as a percentage of gross domestic product (GDP).

<sup>1)</sup> Annual growth rates for financial transactions are calculated as 100\*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the end-of-quarter stock value four quarters earlier.

2) Calculated as 100\*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction or stock four quarters earlier.

<sup>1)</sup> Annual percentage changes are calculated as 100\*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction

or stock four quarters earlier.

2) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets.

3) Annual growth rates for financial transactions are calculated as 100\*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the end-of-quarter stock value four quarters earlier.

<sup>4)</sup> In line with existing conventions, the financing of the government excludes the net incurrence of liabilities via financial derivatives, shares and other equity, pension schemes and other accounts payable, and the financial investment of the government excludes financial derivatives, prepayments of insurance premiums and reserves for outstanding claims and other accounts receivable.

 <sup>5)</sup> Other accounts receivable, financial derivatives and prepayments of insurance premiums and reserves for outstanding claims.
 6) Other accounts payable, pension fund reserves, financial derivatives and unlisted shares and other equity.

<sup>1)</sup> Annual percentage changes are calculated as 100\*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction or stock four quarters earlier.

2) As a percentage of net value added in the case of net entrepreneurial income and net saving.

3) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).

<sup>4)</sup> Annual growth rates for financial transactions are calculated as 100\*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the end-of-quarter stock value four quarters earlier.

5) Monetary gold and SDRs, other accounts receivable, and prepayments of insurance premiums and reserves for outstanding claims.

6) Monetary gold and SDRs, other accounts payable and financial derivative's net liabilities.
