

PRESS RELEASE

28 April 2017

Euro area economic and financial developments by institutional sector: 4th Quarter 2016

- Euro area saving (net, as a percentage of disposable income) was higher in the fourth quarter of 2016 compared to the fourth quarter of the previous year. Total euro area non-financial investment (net) was unchanged while increasing for households and for non-financial corporations. As a result of changes in saving and non-financial investment, euro area net lending to the rest of the world increased.
- Household debt was lower compared to a year ago, both with respect to GDP and disposable income (the respective ratios decreased to 58.7% and to 93.6%).
- The non-financial corporation debt-to-GDP ratio was higher (133.4%) in the fourth quarter of 2016 compared to a year ago (133.1%). Partly due to one-off effects, gross non-financial investment increased at a higher rate (8.1% after 3.8% in the third quarter of 2016).

European Central Bank Directorate General Communications Global Media Relations Division, Sonnemannstrasse 20, 60314 Frankfurt am Main, Germany Tel.: +49 69 1344 7455, e-mail: <u>media@ecb.europa.eu</u>, website: <u>www.ecb.europa.eu</u>

Total euro area economy

Euro area net saving, that is the sum of the savings of households, corporations and the government sector after deducting the consumption of fixed capital, increased to 7.1% of euro area net disposable income in the fourth quarter of 2016, compared with 6.6% in the fourth quarter of 2015. Euro area net non-financial investment was unchanged at 3.0% of net disposable income as increased investment by households and non-financial corporations were partly offset by decreased investments of financial corporations and government. As a result of changes in saving and non-financial investment euro area net lending to the rest of the world increased compared with the fourth quarter of 2015 (4.1% after 3.8% of net disposable income). Net lending by households as percentage of euro area net disposable income decreased (2.8% after 3.2%) while net lending of non-financial corporations was unchanged (2.6%). Net lending by the financial corporations sector was broadly unchanged and net borrowing by the government sector decreased compared with the fourth quarter of 2015 (4.1% after 3.8%).

Households

Household gross disposable income increased at an unchanged rate of 1.9% in the fourth quarter of 2016. Gross operating surplus and mixed income from the self-employed increased at a lower rate (fourth quarter 2016: 2.3%, third quarter: 2.7%), while the compensation of employees grew at a broadly unchanged rate of 2.7%. Household consumption expenditure grew at a higher rate of 2.8% (after 2.1%).

The household gross saving rate in the fourth quarter of 2016 was 12.3%, compared to 12.4% a year ago.

Household gross non-financial investment (which refers mainly to housing) grew at a broadly unchanged rate, compared with the previous quarter, of 5.6%. Loans to households, the main component of household financing increased at a higher rate of 2.1% (after 1.9%).

Household financial investment grew at a lower rate of 2.0% (after 2.2%). Among the components, currency and deposits grew at a higher rate (4.1% after 3.8%). Life insurance and pension schemes grew at a lower rate (2.8% after 3.0%). Shares and other equity decelerated as well (1.1% after 1.3%). Households continued to buy investment fund shares on a net basis, in particular non-money market fund shares. Investment in debt securities continued to decline at a high rate (-11.1% after -10.0%). This development is in particular due to a reduction of household holdings of debt securities issued by MFIs.

Household net worth increased at a higher rate of 4.4% (after 4.2%), as high net valuation gains on financial and on non-financial assets as well as investments were only partly offset by the incurrence of liabilities. The value of housing wealth increased at a higher rate (4.9% after 4.3%). The household debt-to-income ratio continued to decrease, to 93.6% in the fourth quarter of 2016 from 94.1% in the fourth quarter of 2015, as disposable income grew faster than loans to households. Table A summarises the main results for households, expressed as a percentage of adjusted disposable income (For details, see also Tables 2.1 and 2.2 in the Annex).

Table A Household saving, change in net worth and debt (percentages of adjusted gross disposable income, based on four-quarter cumulated flows)

Non-financial corporations

Non-financial corporations' net entrepreneurial income (broadly equivalent to current profits) increased at a lower rate (1.2% after 3.3%) in the fourth quarter of 2016, as net operating surplus accelerated whereas net property income decreased. Net value added increased at a lower rate (2.2% after 2.7%). Partly due to one-off effects, annual growth of gross non-financial investment and gross fixed capital formation accelerated (8.1% after 3.8%, and 9.9% after 3.6%).¹ Financing of non-financial corporations grew at an unchanged rate of 1.8%. Loan financing grew at a higher rate (1.1% after 0.9%), as loans received from MFIs grew at a higher rate and loans from non-MFIs grew at a broadly unchanged rate.² The issuance of debt securities grew at a higher rate (7.7% after 6.5%), as did trade credit financing (4.2% after 2.7%). Non-residents, non-money market investment funds and MFIs were the main net purchasers of non-financial corporation debt securities. Equity financing grew at a lower rate (1.6% after 1.9%).

The debt-to-GDP ratio increased to 133.4% compared to 133.1% in the fourth quarter of 2015.

Financial investment grew at an unchanged rate of 3.4%. Among the components, loans granted grew at a broadly unchanged rate of 2.0%, and investment in shares and other equity grew at an unchanged rate of 4.1%. Table B summarises the main results for non-financial corporations, expressed as a percentage of net value added (For details, see also Tables 3.1 and 3.2 in the Annex).

¹ The significant increase in the fourth quarter of 2016 is mainly due to transactions from outside the EU to <u>Ireland</u>.

² Loan financing comprises loans granted by all sectors (including loans granted by non-MFI financial institutions) and by creditors that are not residents in the euro area.

These data come from the second release of quarterly euro area sector accounts from the European Central Bank (ECB) and Eurostat, the statistical office of the European Union.

This press release incorporates revisions and completed data for all sectors compared with the first quarterly release on "Euro area households and non-financial corporations" of 12 April. Information on quarterly financial and non-financial accounts by institutional sector including euro area and national charts is available on the "Sector Accounts" page of the Statistics section of the ECB's website at <u>Macroeconomic statistics/Sector accounts</u> (direct link to the sector accounts data in the ECB's Statistical Data Warehouse <u>Sector account data</u>). A new visual presentation of who-to-whom funding relationships between sectors is available in "Our statistics" at <u>http://www.euro-area-statistics.org</u>.

The next release of the new <u>Household Sector Report</u> containing results for the euro area and all euro area countries is scheduled for 12 May 2017. The next quarterly press release, with advanced results for households and non-financial corporations, is scheduled for 6 July 2017 (see also the Statistical Release Calendar on the ECB website: calendar).

For media queries, please contact Stefan Ruhkamp, tel.: +49 69 1344 5057.

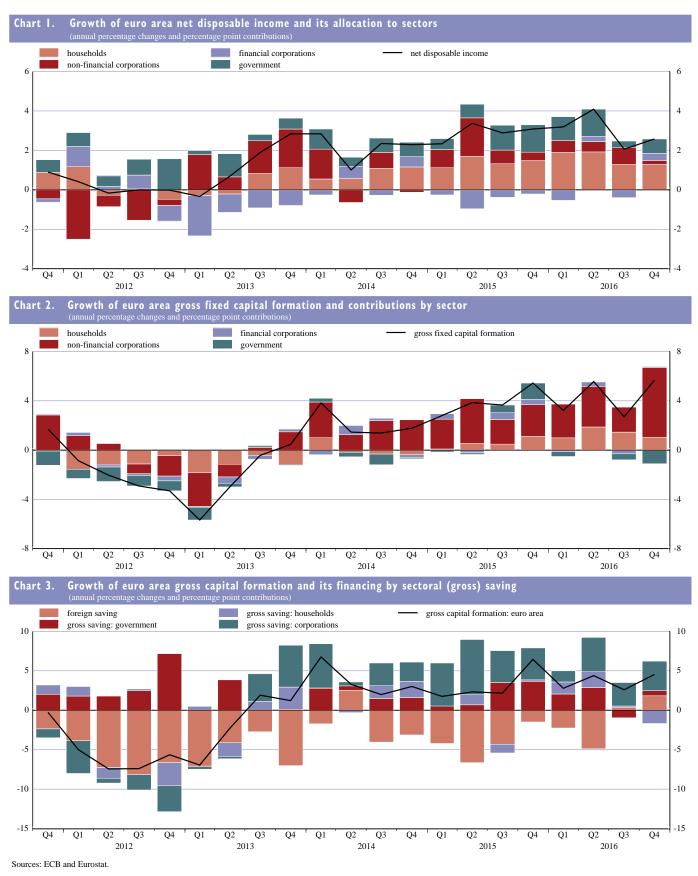

Notes:

- The annual growth rate of non-financial transactions and of outstanding assets and liabilities (stocks) is calculated as the percentage change between the value for a given quarter and that value recorded four quarters earlier. The annual growth rates used for financial transactions refer to the total value of transactions during the year in relation to the outstanding stock a year before.
- Net entrepreneurial income is broadly equivalent to current profits in business accounting (after the receipt and payment of interest and including the profits of foreign subsidiaries, but before the payment of income taxes and dividends).
- The sum of household debt and non-financial corporation debt (also referred to as "private debt"), as a percentage of GDP is one of the headline indicators of the macroeconomic imbalances procedure (MIP). For non-financial corporations the definition of debt used by the MIP differs from the definition applied here as the MIP indicator is based on annual, consolidated data, moreover, pension fund reserve liabilities and trade credits are excluded. For the MIP data see: <u>Annual</u> scoreboard for the surveillance of macroeconomic imbalances.
- Further methodological information is available at: Euro area accounts.

1) Annual percentage changes are calculated as 100*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction x in quarter t, and x(t-4) for the transaction four quarters earlier.
2) Households and non-profit institutions serving households.
3) Transfers of goods and services by government units and non-profit institutions serving households (NPISHs) to individual households.
4) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).

1) Households and non-profit institutions serving households.

2) Calculated as 100*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction or stock four quarters earlier.

2) Cancended as two (A(y-A(y-y)/A(y-y) where A(y) status to the mainsterior of end-of-quarter stock x in quarter t, and X(t-4) for the transaction of stock four quarters earlie 3) Net adjustment for the change in net equity of households in pension schemes (receivable - payable). 4) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land). 5) Annual growth rates for financial transactions are calculated as $100^{\circ}(f(t)+f(t-2)+f(t-3))/F(t-4)$ where f(t) stands for the transactions in quarter t, and F(t-4) for the end-of-quarter stock value four quarters earlier.

6) Loans granted, prepayments of insurance premiums and reserves for outstanding claims and other accounts receivable.

7) Financial derivative's net liabilities, pension schemes and other accounts payable.

8) Debt is equal to loans received and presented as a percentage of gross domestic product (GDP).

Sources: CB and Eurostat. 1) Annual growth rates for financial transactions are calculated as $100^{*}(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4)$ where f(t) stands for the transactions in quarter t, and F(t-4) for the end-of-quarter stock value four quarters earlier. 2) Calculated as $100^{*}(x(t)-x(t-4))/x(t-4)$ where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction or stock four quarters earlier.

1) Annual percentage changes are calculated as 100*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction

or stock four quarters earlier.

 $\begin{array}{l} \text{Output} \label{eq:constraint} \\ \text{Output} \label{eq:constraint}$

end-of-quarter stock value four quarters earlier.

4) In line with existing conventions, the financial investment of the government excludes financial derivatives, prepayments of insurance premiums and reserves for outstanding claims and other accounts receivable, and the financing of the government excludes the net incurrence of liabilities via financial derivatives, shares and other equity, pension schemes and other accounts receivable.
5) Other accounts payable.
6) Other accounts payable, pension fund reserves, financial derivatives and unlisted shares and other equity.
