

PRESS RELEASE

27 April 2018

Euro area economic and financial developments by institutional sector: fourth guarter of 2017

- Euro area saving (net, as a percentage of disposable income) was higher in the fourth quarter of 2017 than in the same quarter of the previous year. Total euro area non-financial investment (net) increased owing to higher investment by households and non-financial corporations (NFCs). Euro area net lending to the rest of the world decreased compared with the year before.
- The household debt to GDP ratio was lower compared with the previous year and decreased to 58.1%.
- The debt-to-GDP ratio of non-financial corporations decreased compared with the year before and stood at 131.6%. Gross non-financial investment of NFCs increased at a lower annual rate (3.4% after 4.1% in the previous quarter).

* Net saving minus net capital transfers to the rest of the world (equals the change in net worth due to transactions).

Chart 2. Debt ratios of households and non-financial corporations

* Outstanding amount of loans, debt securities, trade credits and pension scheme liabilities.

^{**} Outstanding amount of loan liabilities.

Total euro area economy

Euro area, net saving, that is the sum of the savings of households, corporations and the government sector after deducting the consumption of fixed capital, increased to 8.3% of euro area net disposable income in the fourth quarter of 2017 (from 7.8% in the fourth quarter of 2016). Euro area net non-financial investment increased to 4.3% of net disposable income (from 3.5%), as investment by households and NFCs increased and net investments by government, as well as investment by financial corporations were broadly unchanged. Euro area net lending to the rest of the world decreased compared with the fourth quarter of 2016 (to 4.0% of net disposable income, from 4.4%), as non-financial investment increased more than savings. Net lending by households decreased as percentage of euro area net disposable income (to 2.4%, from 2.8%) as did the net lending of non-financial corporations (to 1.5%, from 2.4%). Net lending by the financial corporations sector increased (to 1.2%, from 1.0%) and net borrowing by the government sector decreased (For details, see also Table 1 in the Annex).

Households

The annual growth rate of household gross disposable income was broadly unchanged at 2.7% in the fourth quarter of 2017. Gross operating surplus and mixed income of the self-employed increased by 3.4% (after 3.7%), and the compensation of employees grew at broadly unchanged rate of 3.6%. Household consumption expenditure grew at a lower rate of 2.6% (after 3.0%).

The household gross saving rate in the fourth quarter of 2017 was 12.0%, compared with 12.2% in the same quarter of the previous year.

The annual growth rate of household gross non-financial investment (which refers mainly to housing) increased to 7.3% in the fourth quarter of 2017, from 6.7% in the previous quarter. Loans to households, the main component of household financing, increased at a higher rate of 3.0% (after 2.8%).

The annual growth rate of household financial investment stood at an unchanged rate of 2.1% in the fourth quarter of 2017. Among its components, currency and deposits grew at a lower rate of 3.3% (after 3.7%). Investment in life insurance and pension schemes grew at a broadly unchanged rate of 2.1%. Shares and other equity grew at a higher rate of 1.9% (after 1.6%). However, households were net sellers of listed shares in particular issued by NFCs in the four quarters up to the fourth quarter of 2017. Investment fund shares grew at a higher rate of 7.6% (after 6.0%); in particular non-money market fund shares increased at a higher rate. Investment in debt securities continued to decline, at a higher rate of -11.1% (after -10.8%). This development is due in particular to a reduction of household holdings of debt securities issued by monetary financial institutions (MFIs).

The annual growth rate of household net worth stood broadly unchanged at 5.2% in the fourth quarter of 2017, as investments and net valuation gains on financial and on non-financial assets were only partly offset by the incurrence of liabilities. The value of housing wealth increased at a higher rate of 6.4% (after 5.6%). The household debt-to-income ratio increased to 93.6% in the fourth quarter of 2017 from 93.3% in

European Central Bank Directorate General Communications

the fourth quarter of 2016 while the household debt-to-GDP ratio decreased, as loans to households grew at a faster pace than disposable income, but at a slower pace than GDP.

Table A summarises the main results for households, expressed as a percentage of adjusted disposable income (For details, see also Tables 2.1 and 2.2 in the Annex).

Table A Households percentages of adjusted gross disposable income, based on four-quarter cumulated flows)													
								Q4 2017					
Saving rate (gross)	12.4	12.4	12.3	12.2	12.1	12.0	12.0	12.0					
Non-financial investment (net)	1.1	1.2	1.3	1.3	1.5	1.5	1.6	1.7

Debt (loans, outstanding amount)	93.2	93.3	93.4	93.3	93.0	93.2	93.1	93.6					

Non-financial corporations

The annual growth rate of non-financial corporations' net entrepreneurial income (broadly equivalent to current profits) increased to 10.2% in the fourth quarter of 2017, as the impact from an acceleration in property income was higher than the impact from a deceleration in net operating surplus. Net value added increased at a lower rate (4.7% after 5.4%). The annual growth of gross fixed capital formation accelerated to 3.6% (from 1.9%), and gross non-financial investment growth (which also includes changes in inventories and net acquisitions of non-produced assets) decelerated to 3.4% (from 4.1%). Financing of non-financial corporations increased at a lower rate (2.2% after 2.6%). Loan financing grew at a higher rate of 3.0% (after 2.5%), reflecting an increase in the annual growth rate of loans received from MFIs and from other resident sectors, while loans from the rest of the world grew at a lower rate. The annual growth rate of issuance of debt securities decreased to 5.2% in the fourth quarter of 2017, from 7.1% in the previous quarter. Trade credit financing and equity financing also grew at lower rates, of 3.7% (after 4.7%) and 1.4% (after 2.2%) respectively.

Non-financial corporations' debt-to-GDP ratio decreased to 131.6% in the fourth quarter of 2017, from 134.4% in the previous year.

Financial investment grew at a lower rate of 3.7% (after 4.3%), compared with the previous quarter. Among its components, loans granted grew at a lower rate of 4.3% (after 7.7%), as did investment in shares and other equity (1.9% after 2.5%).

Table B summarises the main results for non-financial corporations, expressed as a percentage of net value added (For details, see also Tables 3.1 and 3.2 in the Annex).

Notes:

- These data come from a second release of quarterly euro area sector accounts from the European Central Bank (ECB) and Eurostat, the statistical office of the European Union. This release incorporates revisions compared with the first quarterly release and provides data for all sectors, thus completing the data on euro area households and non-financial corporations released on 6 April 2018. The tables and charts accompanying the present press release are available in the <u>publications section</u> of the ECB's Statistical Data Warehouse. The next quarterly press release, with advance results for households and non-financial corporations, is scheduled for 4 July 2018, while the full <u>release calendar</u> can be found on the ECB's website.
- Further data and methodological information are available in the statistics section of the ECB's website under
 <u>Macroeconomic statistics/Sector accounts.</u> All <u>sector account data</u> can be accessed via the Statistical Data Warehouse. A
 visual presentation of who-to-whom funding relationships between sectors is available in "<u>Our statistics</u>".
- The annual growth rate of non-financial transactions and of outstanding assets and liabilities (stocks) is calculated as the
 percentage change between the value for a given quarter and that value recorded four quarters earlier. The annual growth
 rates used for financial transactions refer to the total value of transactions during the year in relation to the outstanding stock
 a year before.
- The definition of debt used in this release differs from the definition applied for the macroeconomic imbalance procedure (MIP). For details see the <u>ECB's website</u>. For MIP data see: <u>Annual scoreboard for the surveillance of macroeconomic imbalances</u>.
- The next release of the ECB's <u>Household sector report</u> containing results for the euro area and all EU countries is scheduled for 8 May 2018.

- 1) Households and non-profit institutions serving households.
- 2) Calculated as 100*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction or stock four quarters earlier.

- 3) Net adjustment for the change in net equity of households in pension schemes (receivable payable).
 4) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).
 5) Annual growth rates for financial transactions are calculated as 100*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the end-of-quarter stock value four quarters earlier.
- 6) Loans granted, prepayments of insurance premiums and reserves for outstanding claims and other accounts receivable.
- 7) Financial derivative's net liabilities, pension schemes and other accounts payable.
- 8) Debt is equal to loans received and presented as a percentage of gross domestic product (GDP).

¹⁾ Annual growth rates for financial transactions are calculated as 100*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the end-of-quarter stock value four quarters earlier.

2) Calculated as 100*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction or stock four quarters earlier.

¹⁾ Annual percentage changes are calculated as 100*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction

or stock four quarters earlier.

2) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets.

3) Annual growth rates for financial transactions are calculated as 100*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the end-of-quarter stock value four quarters earlier.

⁴⁾ In line with existing conventions, the financial investment of the government excludes financial derivatives, prepayments of insurance premiums and reserves for outstanding claims and other accounts receivable, and the financing of the government excludes the net incurrence of liabilities via financial derivatives, shares and other equity, pension schemes and other accounts payable.

5) Other accounts receivable, financial derivatives and prepayments of insurance premiums and reserves for outstanding claims.

6) Other accounts payable, pension fund reserves, financial derivatives and unlisted shares and other equity.

¹⁾ Annual percentage changes are calculated as 100*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction or stock four quarters earlier.

2) As a percentage of net value added in the case of net entrepreneurial income and net saving.

3) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).

⁴⁾ Annual growth rates for financial transactions are calculated as 100*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the

end-of-quarter stock value four quarters earlier.

5) Monetary gold and SDRs, other accounts receivable, and prepayments of insurance premiums and reserves for outstanding claims.

6) Monetary gold and SDRs, other accounts payable and financial derivative's net liabilities.
