

02 December 2009

## PRESS RELEASE

### EURO AREA MFI INTEREST RATE STATISTICS: October 2009

In October 2009 the majority of the average MFI interest rates on new deposits and new loans decreased further. All the average MFI interest rates on outstanding amounts of deposits and loans decreased in October and almost all of them have now reached their lowest level since the start of these series in January 2003.

**MFI interest rates on new business:** in October 2009 the weighted average rate on deposits from households with an agreed maturity of up to one year increased by 7 basis points to 1.68% while the corresponding deposit rate for non-financial corporations remained basically unchanged at 0.66%. The weighted average rate on deposits from households redeemable at up to three months' notice decreased by 5 basis points to 1.55%.

The interest rate on housing loans to households at a floating rate or with an initial rate fixation period of up to one year remained basically unchanged at 2.78%. The corresponding rate on loans with an initial rate fixation period of more than five years and up to ten years remained basically unchanged at 4.45%. The weighted average rate on loans to households for consumption purposes, with an initial rate fixation period of over one and up to five years, decreased by 8 basis points to 6.39% in October 2009.

In the case of loans to non-financial corporations at a floating rate or with an initial rate fixation period of up to one year, the weighted average rate remained basically unchanged in October, at 3.33%, for loans up to EUR 1 million and increased by 8 basis points, to 2.14%, for loans above EUR 1 million. The weighted average rate on loans to non-financial corporations over EUR 1 million with an initial rate fixation period of more than five years remained basically unchanged at 3.62%.

**MFI interest rates on outstanding amounts:** in October 2009 the weighted average interest rate on outstanding amounts of deposits from households with an agreed maturity of up to two years decreased by 19 basis points to 2.64%. The corresponding rate on deposits with an agreed maturity of over two years decreased by 6 basis points to 2.95%. The weighted average interest rate on outstanding amounts of deposits from non-financial corporations with an agreed maturity of up to two years decreased by 10 basis points to 1.72% in the same month.

In October the weighted average interest rate on outstanding amounts of loans to households for house purchase with over five years' maturity decreased by 8 basis points to 4.17% and the weighted average

interest rate on outstanding amounts of loans to non-financial corporations with over five years' maturity decreased by 8 basis points to 3.60%.

**Weighting method:** the interest rates on new business are weighted by the size of the individual agreements. This is done both by the reporting agents and when computing the national and euro area averages. In addition to changes in the actual interest rates, changes in the euro area average interest rates on new business therefore reflect changes in the weights of the new business per country for the instrument categories concerned.

#### Notes

- *In addition to the monthly euro area MFI interest rate statistics for October 2009, this press release incorporates minor revisions to the data for previous periods.*
- *“New business” refers to any new agreement between the customer and the MFI, while “outstanding amounts” refers to the stock of all deposits and all loans at a specific moment in time. Three instrument categories – overnight deposits, bank overdrafts and deposits redeemable at notice – form a separate group for which interest rates on new business and on outstanding amounts coincide.*
- *In this press release ‘up to’ means ‘up to and including’.*
- *The period of initial rate fixation is any predetermined period of time at the start of a contract during which the interest rate cannot be changed.*
- *Unless otherwise indicated, the statistics refer to the changing composition of the euro area, i.e. they cover the EU Member States that had adopted the euro at the time to which the data relate. The statistics include Greece as of January 2001, Slovenia as of January 2007, Cyprus and Malta as of January 2008 and Slovakia as of January 2009.*
- *The corresponding business volumes for each of the MFI interest rate categories are shown in Tables 2 and 4 of the annex.*
- *More detailed information on MFI interest rate statistics, including the release calendar, is available under “MFI interest rate statistics” in the “Statistics” section of the ECB’s website (<http://www.ecb.europa.eu>).*

Source: ECB MFI interest rate statistics.

1) In the above table 'up to' shall mean 'up to and including'. Cypriot and Maltese data are included in euro area aggregates as of January 2008. Slovakian data are included in euro area aggregates as of January 2009.

2) For this instrument category, new business and outstanding amounts coincide. End-of-period rates.

3) For this instrument category, households and non-financial corporations are merged and allocated to the household sector, since the outstanding amounts of non-financial corporations are negligible compared with those of the household sector in all participating Member States combined.

4) The annual percentage rate of charge covers the total cost of the loans. These total costs comprise an interest rate component and a component of other (related) charges, such as the cost of inquiries, administration, preparation of documents, guarantees, etc.

1) In the above table 'up to' shall mean 'up to and including'. Cypriot and Maltese data are included in euro area aggregates as of January 2008. Slovakian data are included in euro area aggregates as of January 2009.

2) The business volumes for all outstanding amounts indicators are derived from non-seasonally adjusted MFI balance sheet statistics.

3) Based on ECB estimations for some countries.
