a) Figures may not add up due to rounding. The information in this table is based on the consolidated balance sheet of monetary financial institutions (MFIs) located in the euro area. The MFI sector comprises the Eurosystem, deposit-taking corporations except central banks and money market funds.

Monthly flows are derived from differences in levels excluding changes that do not arise from transactions, such as revaluations, exchange rate variations and statistical reclassifications.

M3 comprises liabilities of MFIs, as well as short-term deposit liabilities of post offices and specific central government entities, vis-à-vis non-MFI euro area residents other than central government.

b) Includes holdings of the central government of deposits with the MFI sector and of securities issued by the MFI sector.

c) Private sector refers to euro area non-MFIs excluding general government.

d) Loans adjusted for the effects of transfers to and from MFI balance sheets, as well as for notional cash pooling services provided by MFIs. For further breakdowns see Table 4.

e) The series is not adjusted for seasonal effects.
