

Table E-IV: Durables Expenditure Components

We replicate the 2SLS regressions of Table IV for sub-components of expenditures in various durable goods. Estimates for TV expenditure is shown in Columns (1)-(2), for other electronics (cameras and video cameras, DVD players, smartphones, stereo, voice recorder etc.) are reported in Columns (3)-(4), for durable transportation expenditure (cars, motorcycles, electric bicycles, bicycles and other) in Columns (5)-(6), for household equipment (furniture and home appliances, washing machine, refrigerator etc.) in Columns (7)-(8) and for housing expenditure (purchasing or building a house) in Columns (9)-(10). All regressions include city-level controls, household fixed effects, interacted province-year fixed effects, and county time-trends as specified in Equation 3. The samples consist of all households for which the labor income share  $S$  stemming from minimum wage is more than 50% ( $S > 0.5$ ), or more than 75% ( $S > 0.75$ ) of household disposable income. Weak instrument row shows the p-value of the Kleibergen and Paap (2006) test under the null of weak instrument. Standard errors clustered at county-level are shown in parentheses. \*, \*\*, \*\*\* denotes statistical significance at the 10%, 5%, 1% level, respectively.

	Television		Other Electronics		Transportation		HH Equipment		Housing	
	$S > 0.5$ (1)	$S > 0.75$ (2)	$S > 0.5$ (3)	$S > 0.75$ (4)	$S > 0.5$ (5)	$S > 0.75$ (6)	$S > 0.5$ (7)	$S > 0.75$ (8)	$S > 0.5$ (9)	$S > 0.75$ (10)
MW dependency:										
Labor and transfer income	0.109 (0.066)*	0.102 (0.062)*	0.020 (0.022)	0.016 (0.020)	-0.049 (0.180)	-0.005 (0.183)	0.047 (0.071)	0.046 (0.066)	-0.160 (0.463)	-0.171 (0.426)
