Notes

- a) The calendar adjustment is verified only for the series seasonally adjusted directly.
- b) The seasonal adjusted estimates of Loans to other euro area residents adjusted for the derecognition of loans from the MFI statistical balance sheet due to their sale or securitisation are derived on a best effort basis given the current data availability: the seasonally adjusted series of Loans to other euro area residents is adjusted directly for such derecognition by the same amounts used for the corresponding non seasonally adjusted total loan series.
